SEED GROWERS

Moreton Farm

COLDWATER, N. Y.

About Orders, Shipping, Etc.

The prices quoted in this list do not include cost of delivery, which must be paid by the purchaser. We make no charge for bags, or packing.

PARCEL POST

Parcel post rates are very low to places within 150 miles of Rochester. Only 1c per pound after the first pound which is 5c.

The following tables give the rates to different parts of the country:

	Each Additional			Each Additional	
	1 lb.	lb.		1 lb.	lb.
Alabama	\$.08	\$.06	Nebraska	\$.09	\$.08

When ordering seeds sent by parcel post please add enough money to the price to cover the necessary postage which we shall have to pay.

BY EXPRESS. The express rates are now a little lower than parcel post to places within 300 miles (3rd zone) on all lots weighing 50 lbs. or more, and on 25 lbs. or more to more distant points. On smaller packages parcel post is cheaper. Express charges need not be prepaid, but parcel post must be.

BY FREIGHT. Lots weighing over 100 lbs. will go much cheaper by freight than by express, but it takes longer for freight to get through. If seeds are wanted immediately and you are willing to pay the extra cost it is best to have them sent by express. The best way is to order early and have heavy seeds sent by freight.

Please state on your order whether you wish the seeds sent by parcel post, express, or freight. If ordered by parcel post please add to the amount remitted enough to pay postage.

CONDITIONS OF SALE. We agree to assume the responsibility of the seeds and plants we sell reaching the purchaser in good condition, and should any seeds fail to grow under favorable conditions, or prove not true to name or of inferior quality, we will REFUND THE MONEY PAID FOR THEM or replace them without charge, but all our seeds and plants are sold on the distinct understanding and with the agreement by the purchaser that we will not be liable for any loss or damage that may occur by reason of the failure of seeds or plants to grow or to be of the variety or quality offered. We will not accept or fill orders on any other terms. JOSEPH HARRIS CO.

TERMS. Our regular terms are cash with order, less a discount of 2 per cent, except Grass seeds, Potatoes and Onion sets, on which no discount can be allowed. We should, however, be glad to open accounts with any gardeners of established credit, or who will furnish us satisfactory references. On such accounts all bills are due August 1, with no discount.

JOSEPH HARRIS CO.,
Coldwater, N. Y.

A Field of Onion Seed at Moreton Farm

We are Seed GROWERS—Not mere dealers

Having a large farm entirely devoted to raising vegetables and flower seeds and plants, we are able to produce a much larger proportion of the seeds we sell than any other seedsmen of whom we have any knowledge. In fact, according to the reports of the U. S. Department of Agriculture we raise practically all the vegetable seeds produced in New York State, except cabbage, beans and a small quantity of spinach seed.

Northern Grown Seeds

It has been abundantly proved that such seeds as tomatoes, corn, peppers, melons, etc., grown in the North produce much earlier and better crops in the northern states than seed raised in the South. Earliness is often of great importance to the market grower, so he should be careful to get seeds actually raised in the North where the seasons are short. Many seedsmen doing business in the North get their tomato seeds from California, melon seeds from Oklahoma or Arizona, pepper seed from Georgia, and so on.

We are situated near the northern border, a few miles from Lake Ontario. Seeds raised here must mature early or get caught by frost. This fact insures early strains of such varieties as we raise here.

How Many Seeds Will Grow?

This question comes up every time any of us start to sow or plant seeds. Almost all commercial seeds contain at least a small percentage of defective or dead seeds that will not germinate. This percentage varies very much in different lots of seed, and it is hard for the gardener to tell how thick to sow in order to avoid an excessive amount of thinning, or a poor stand of plants. Carrot seed, for instance, that contains 60 per cent of live seeds must be sown considerably thicker than a lot that contains 80 per cent.

Harris' Seeds are all marked showing what percentage is of good vitality.

According to Our Tests
98 per cent
 of this seed germinates

This label is put on every lot of seed (except packets) and tells you what proportion of the seeds germinated in our test of this particular lot.

The seeds are all given accurate tests either in soil or a germinating apparatus so there is no guess work about it.

We believe Harris' seeds are the only ones sold with this statement attached.

A Field of Our Special Strain of Copenhagen Market Cabbage

What Others Say

"We got our seeds from you last spring. I think they are the best we ever sowed. I think every seed grew."—Jos. Buchanan, Flesherton, Ont.

"I want to say that I like your condition of sale. I like the quality of the seed I receive (the very best). I like the prompt sending of my order. In fact, I feel satisfied with what I get and what I pay for it."—W. Harrison Jordan, South Attleboro, Mass.

"Your seeds are the most reliable in quality and most reasonable in price of any that we have ever used."—Chas. E. Purdy, Port Chester, N. Y.

1300 bu. Onions per acre. "Had a record crop of onions from your Yellow Globe Danvers last year. One small piece set out from hot house 3 x 12 in. made a big onion without a missing one. Measured land; weighed crop, 1/5 acre yielded 271 bu. People came for miles to see them. They were cultivated and hoed nine times and side dressed with 5-8-7 fertilizer three times."—J. R. Tallman, North Marshfield, Mass.

"This is the first year I have bought seeds from Joseph Harris Co. and wish to state that your seeds are the best in vitality, quality and production that I have planted in the last ten years. I have been buying all my seeds from H— and from B— in the last ten years but Harris' seeds for me from now on."—Frank Heady, Vincennes, Ind., July 5, 1924.

Brussels Sprouts. "I have tried to raise Brussels Sprouts for years without success but last year I tried your Long Island Improved and had a fine crop."—A. Ploughwright, Rochester, N. Y., May 26, 1924.

"The small order of seeds I got from you last month are doing so fine—grow so strong and so far superior to others planted at the same time, I am sorry now I did not send you my entire order."

"All the seeds you sent me last year were the finest I ever had in 21 years."—S. Marcucio, Danbury, Conn.

"I have never received any seeds from you but what showed careful selection, high quality and true to name. Your seeds justify your claims. Your Harris' Earliest pepper goes well here. Its brilliant red color when ripe has caused it to sell on its looks."

"We have had some trouble in past years in getting good results from Tomato pepper and Egg Plant of which we grow quite a lot for our plant trade."

One of our customers last year brought us some of your seed to plant for him last spring and we found a much higher percentage of germination from it than from the seeds of some of the largest seed houses in the country, from whom we have been getting seeds in the past."—Coonan & Son, Haverstraw, N. Y.

"Your strain of Crosby's Egyptian beet is very fine. Your Mammoth White Cory corn is a real acquisition. It is early and matures all about the same time and has a lot of big ears and small stalks allowing close planting. I think Harris' Mammoth White Cory, Whipple's Early and Mimms' Hybrid a grand trio—in fact the best. Your Buttercup is a very valuable variety, and I understand from others that Whipple's New Yellow is another great variety. Your Success and Stone tomatoes are both perfection. I have a friend near here who had the best Stone I ever saw this fall from your seed."—James T. Colby, Ridgewood, N. J.

ARTICHOKE

The Globe Artichoke produces the flower buds which are used for food the second year after sowing the seed. The plants are not hardy and require protection in winter north of Virginia.

ASPARAGUS ROOTS. See page 35.

BEANS—Dwarf Wax Varieties

Of the *wax* or *yellow-podded* bush beans, the earliest varieties are Webber Wax with flat pods, and Valentine Wax with round pods. Wardwell's Kidney Wax is a day or two later and has very long flat pods of high quality. This bean is quite apt to rust in wet weather and for this reason Currie's Rust-proof is preferred by many, although the pods are not as long and are somewhat stringy. Sure Crop Wax resembles Currie's Rust-proof but has longer pods which are stringless. Pencil Pod Black Wax is one of the best wax beans with round pods. Hodson Wax is late and very prolific; pods flat. Refugee Wax is also late and has round pods of the highest quality. It is largely used for canning.

Note—We are now offering all seeds by weight instead of measure as formerly. Beans in quantities of 30 lbs. or over will be sold at the 100 lb. rate. We do not sell less than 1 lb. of beans at the pound price. A pound is a pint, 15 lbs. a peck, 60 lbs. a bushel.

	Lb.	15 lbs.	100 lbs.
SURE CROP WAX. Pods 4 to 5 in. long, flat, bright yellow, stringless, and rust resistant. Similar to, but much better than Currie's Rust-proof	\$.25	\$ 2.70	\$17.00
WEBBER WAX or "Cracker Jack." The earliest wax bean with flat pods. The pods are long, straight, stringless and quite free from rust. A heavy bearer25	2.85	18.00
Valentine Wax. Extra early, round pods, free from rust25	2.70	17.00
WARDWELL'S KIDNEY WAX. Very long, flat, deep yellow pods. One of the earliest and most profitable wax beans for market25	2.55	16.00
BURPEE'S NEW KIDNEY WAX. Has narrower and thicker pods than Wardwell's and is more prolific25	2.55	16.00
ROUND POD KIDNEY WAX. Like Wardwell's with round instead of flat pods. One of the best round podded wax beans.25	2.70	17.00
Brittle Wax. Same as Round Pod Kidney Wax25	2.70	17.00
PENCIL POD BLACK WAX. Pods perfectly round, nearly straight, clear yellow, stringless and of highest quality. Plant healthy and prolific. Matures early. Seed black25	2.85	18.00
Davis' White Wax. Hardy and prolific. Long, flat, yellow pods of fair quality. Matures early22	2.40	15.00
Golden Wax, Improved Rust-proof. Short pods. Early22	2.40	15.00
Hodson Wax. Late, very prolific, long, straight, flat pods22	2.40	15.00
CURRIE'S RUST-PROOF BLACK WAX. Hardy and very prolific. Pods broad, flat, deep yellow. An early and profitable market variety22	2.40	15.00
REFUGEE WAX. Round pods of fine quality, very prolific, matures late25	2.55	16.00

BEANS—Dwarf Green-Podded Varieties

If your market requires a round-pod bean, Full Measure, Giant Stringless Green Pod and Black Valentine are the most profitable. If a flat pod is required, Bountiful is one of the best varieties.

	Lb.	15 lbs.	100 lbs.
FULL MEASURE. Very prolific; long, round pods; medium early and a profitable market variety	\$.25	\$ 2.55	\$16.00
Stringless Green Pod. Round, thick, light green pods of high quality25	2.55	16.00
GIANT STRINGLESS GREEN POD. Larger than Stringless Green Pod and fully as early. Very prolific and one of the very best green-podded bush beans. Round, light green pods of high quality25	2.55	16.00
BLACK VALENTINE. A profitable market bean. Produces immense crops of long, straight, light green pods, round as a pencil and very attractive in appearance25	2.55	16.00

BEANS, Continued

	Lb.	15 lbs.	100 lbs.
BOUNTIFUL. Very prolific. Long, flat pods of fine quality; very early	\$.25	\$ 2.70	\$17.00
Improved Round Pod Valentine. Extra early, long, straight, round pods	.25	2.55	16.00
Refugee or 1000 to 1. Late, very prolific	.22	2.40	15.00
NEW STRINGLESS REFUGEE. A stringless strain of the old Refugee	.25	2.70	17.00
Lowe's Champion. One of the Horticultural or Cranberry beans. Pods 5 in. long, flat, green, straight and stringless	.25	2.55	16.00
Ruby Dwarf Horticultural. Used for shelling green. Pods light green splashed with deep red	.25	2.85	18.00
FRENCH HORTICULTURAL. The best strain of dwarf Horticultural beans. More prolific and vigorous and free from disease than other kinds. Pods long, straight and highly colored. Matures a little later than Ruby Dwarf Horticultural and has taller vines	.30	3.30

LIMA BEANS—Dwarf or Bush Varieties

Where beans are sold in the pods, Fordhook is the most popular bush Lima. The beans are of good size and very plump, and the vines are prolific. For shelling, Burpee's Bush Lima of the old type and Burpee's Improved are often used. The beans are large and flat.

FORDHOOK BUSH LIMA. A greatly improved strain of Dreer's or Potato Lima. Large pods and very large thick beans of deep green color. The best of this class	\$.45	\$ 5.40	\$35.00
Henderson's Bush Lima. Small. Early and prolific	.25	2.85	19.00
BURPEE'S BUSH LIMA, Wonder Strain. Large, medium early	.35	3.90	25.00
Burpee's IMPROVED Bush Lima. (New). Larger pods and thicker beans than the old variety and of deeper green color. A little later than Wonder Strain	.35	3.90	25.00

LIMA BEANS—Pole

EARLY LEVIATHAN LIMA. Very early, large pods. The best early pole Lima	.28	3.75	24.00
Challenger Lima. An improved strain of Dreer's Pole Lima. Large pump beans of the "Potato" class	.30	3.30	21.00

OTHER POLE BEANS

Golden Cluster Wax. Produces long, broad, deep yellow pods of finest quality; beans white. Pods often 7 in. long and an inch broad	.35	4.00
Kentucky Wonder. Long, slender, green pods of fine quality. Early and very prolific	.25	2.85	18.00
Kentucky Wonder Wax. Long, flat, yellow pods of fine quality. One of the best wax pole beans	.30	3.45	22.00
SCOTIA. Long, slender, green pods of the very finest quality. Wonderfully prolific	.30	3.45	22.00
White Dutch Runner. Very large white beans often used in place of Limas. Very prolific and early	.35	3.75
Lazy Wife. Large, flat, green pods, very productive	.25	3.75
KING HORTICULTURAL. Much superior to the old London Horticultural. Earlier, longer pods of brighter color and stringless	.35	4.00
Speckled Cranberry or London Horticultural	.30	3.00

FIELD BEANS

(Prices per 100 lbs. subject to change. Please write for price if a considerable quantity is required.)

Boston Marrow or White Marrowfat. Large, plump, white beans	\$.22	\$ 2.40	\$15.00
Marrow Pea or White Navy. The common White Field Bean	.20	1.80	11.00
ROBUST PEA BEANS. A select strain of Pea beans that is resistant to the mosaic disease	.20	1.95	12.00
Red Kidney. Large red beans, very prolific and a profitable variety. Special disease-resistant strain	.20	2.10	13.00
WHITE KIDNEY. Large, white, kidney-shaped beans; yields heavy crops and is of the highest quality for baking	.20	2.25	14.00
IMPERIAL or PROLIFIC TREE. The beans are white, kidney-shaped, somewhat smaller than White Kidney and of fully as high quality. Yields heavy crops	.22	2.55
Yellow Eye. Large plump white beans with a yellow blotch at the "eye"	.20	2.10	13.00

Crosby's Egyptian Beet

HARRIS' SPECIAL STRAIN

Particular gardeners who want the very finest beets both in shape and color will find this special stock to meet their requirements.

The seed is of our own growing and the most careful selection has been practiced for more than fifteen years until now we have a strain that is practically "fixed" so that the beets come all alike, nearly every one a model for shape and color.

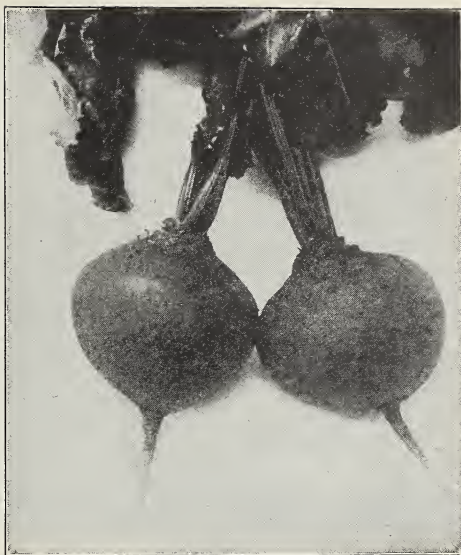

The beets are globe shape, very deep red and perfectly smooth and with very small tap roots. The tops are unusually small. This beet grows very rapidly and is ready for market earlier than any other kind we know of. It is much earlier than Detroit Dark Red and Early Blood Turnip.

This is the finest strain of Crosby's Egyptian beet obtainable no matter what price is charged for the seed.

We are glad to say that our seed this year is exceptionally fine and shows high germination. Oz. 15c; ¼ lb. 40c; lb. \$1.25. 5 lbs or more at \$1.15 per lb.

Your special strain of Crosby's Egyptian Beet is the nearest perfect in shape, color, etc., of any beet I have grown in forty years of gardening."—C. A. Baker, Milford, N. H.

"I like your seeds. Your Crosby's Egyptian beet is especially fine—Very early and of better shape than any seed of that variety that I have ever used. All other seed produced so many flat ones and were no good except for earliest bunching. Yours were good and tender as long as Detroit and uniformly dark colored all through, and in every way ahead of all other beets I ever tried."—P. D. Kemrer, Lancaster, Pa.

Crosby's Egyptian Beet

DETROIT DARK RED BEET—Harris' Selected Strain

This strain produces beets of uniform globe shape and deep red color without light rings when cut.

This is a very superior stock, being more uniform than any other strain we have been able to find.

The seed is of our own growing and the greatest care is taken in selecting the beets to set out for seed. The consequence is that this seed produces beets very small tops, fine tap roots and perfect globe shape and very deep color.

This seed costs twice as much to raise as ordinary seed costs, but the crops from it are so much superior that the seed is really worth ten times as much. Oz. 15c; ¼ lb. 40c; lb. \$1.25. 5 lbs. or more at \$1.15 per lb.

Long Season Beet

This is a late beet not of handsome shape but of extremely fine quality, remaining sweet and tender even when very large.

The beets will keep all winter and retain their fine quality until spring. This is not very often grown for market, but where fine quality is appreciated it finds a ready sale at good price.

The beets are half long, very dark red and have green foliage. Oz. 20c; ¼ lb. 60c; lb. \$2.25.

BEETS

For early bunching Crosby's Egyptian is the most popular kind; and if a really first-class strain is used there is no better beet for the purpose. Some gardeners prefer the old flat Egyptian Blood Turnip beet, because it makes salable beets a little quicker than Crosby's. Early Wonder is very similar to Crosby's Egyptian and no earlier than our strain. For later use Detroit Dark Red is excellent. For late fall and winter use it is best to sow the seed about the middle of July in the North and a little later further South. It requires about 10 lbs. of seed to sow an acre.

	Oz.	¼ lb.	lb.
CROSBY'S EGYPTIAN, Harris' Selected Strain. The finest bred strain of this beet. See description above. Seed of our own growing	\$.15	\$.40	\$ 1.25
Crosby's Egyptian. Good seed but not equal to our own strain.			
This is the same as usually sold	.10	.25	.75

BEETS—Continued

	Oz.	¼ lb.	lb.
EARLY WONDER. Quite similar to Crosby's Egyptian but flatter than our strain of that variety. Early and of good color	\$.10	\$.25	\$.90
Egyptian Blood Turnip. Flatter than Crosby's, and is preferred by some for early bunching	.10	.25	.75
DETROIT DARK RED, Selected Strain. Seed of our own growing, very superior stock. See description preceding page	.15	.40	1.25
Detroit Dark Red. Not of our own growing but good seed, equal to any obtainable for the price	.10	.25	.75
ECLIPSE. Early, globe-shaped and very handsome beet, of somewhat lighter color than Detroit but earlier	.10	.25	.75
Edmund's Blood Turnip. Large flat beets. Excellent for fall use	.10	.25	.75
Early Blood Turnip. A good old variety, much like Edmund's	.10	.25	.85
Early Bassano. Large, flat, light-colored beets	.10	.25	.85
Long Smooth Blood Red. 8 to 10 inches long and very dark red	.10	.25	.90
LONG SEASON. A very late variety of fine quality	.20	.60	2.25

Note. We do not sell half ounces unless the price per ounce is 30c or more.

SWISS CHARD

See page 31.

Mangels and Sugar Beets for Stock

	Oz.	¼ lb.	lb.
DANISH YELLOW GIANT. An immense yielder. Very large, oval, deep yellow and rich	\$.08	\$.15	\$.45
Golden Tankard. Oval and easily harvested; yellow flesh. The strain we offer is very fine	.08	.15	.40
NEW "HALF SUGAR" MANGEL. Intermediate between a sugar beet and mangel. Yields immense crops of beets rich in sugar	.08	.15	.40
Mammoth Long Red. Very large, long red roots of good quality. One of the best yielders and keeps well	.08	.15	.40
Giant Yellow Eckendorf. Very large yellow mangel. Blunt at the bottom, easily harvested and immense yielder	.08	.15	.40

BRUSSELS SPROUTS

Cultivation is the same as for cabbage or cauliflower. There is always a good demand for the sprouts, and they bring profitable prices. The point is to get the right seed. We are now able to offer a strain of Long Island Improved Dwarf that produces heavy yields of sprouts. Gardeners will find this a profitable crop.

	Oz.	¼ lb.	lb.
DANISH IMPROVED. An excellent late variety that yields well if set out before the middle of June in the north	\$.35	\$ 1.00	\$ 3.75
LONG ISLAND IMPROVED DWARF. With this variety it is easy to raise good crops as practically every plant produces good firm sprouts and lots of them	.65	2.25

CHINESE OR CELERY CABBAGE—PE-TSAI

This Chinese cabbage has proved to be a very profitable crop for muck land. There is a good demand for it from New York and other large markets in carload lots. The seed is sown in July or August and the crop matures in eight to ten weeks.

	Oz.	¼ lb.	lb.
Pe-Tsai. Large heads. 18 to 20 in. high	\$.25	\$.75	\$ 2.75
Wong Bok. Short compact heads of fine quality	.30	.80	3.00

CABBAGE

Midseason Market Cabbage

This new cabbage has proved to be the most uniform and heaviest yielding medium early variety in our trials the past two seasons. Every plant produces a fine large, round head, every one just alike. The heads are almost perfectly round, large and solid.

We highly recommend this new cabbage for market, shipping, or kraut. It will yield more tons per acre than any variety we know of. Oz. 50c; ¼ lb. \$1.60; lb. \$6.00.

Copenhagen Market Cabbage—Special Strain

This special strain of Copenhagen Market cabbage is much earlier and more uniform than the usual strain of this variety. It is the same as the Copenhagen Market used to be when first sold in this country. The heads form very early, are perfectly round, and have but few outside leaves. It is much like the new Golden Acre cabbage described above but the heads are larger and they mature a week or 10 days later.

Oz. 40c; ¼ lb. \$1.00; lb. \$3.75.

New Early Cabbage

"GOLDEN ACRE"

A wonderfully fine early variety with perfectly round heads of good size and which mature a week earlier than Jersey Wakefield. The heads resemble Copenhagen Market of a very finely bred type. The plants are small with few leaves but the head is of good size, weighing 5 to 6 lbs., as round as a ball, very firm and of good bright green color. Every plant produces a good head and they are all just alike.

Owing to its extreme earliness this cabbage will certainly prove profitable for the first early crop. $\frac{1}{4}$ oz. 40c; oz. \$1.10; $\frac{1}{4}$ lb. \$3.75; lb. \$14.00.

Golden Acre Cabbage

"It may interest you to know that I had a little of your Golden Acre cabbage seed last spring, set the plants out 20th of April and began cutting the 29th of June, making but two cuttings. It is a wonderful first early cabbage."
A. F. Clum, Sennett, N. Y.

CABBAGE—Early Varieties

Jersey Wakefield has long been the standard extra early cabbage, but a round head sells better in most markets and on this account the new Golden Acre and Copenhagen Market have proved more profitable. Enkhuizen Glory has larger heads and is a week later. Burpee's All Head has large flat heads and is a week or two later than the Enkhuizen Glory.

	Oz.	$\frac{1}{4}$ lb.	lb.
Golden Acre. See (above)	\$1.10	\$ 3.75	\$14.00
EARLY JERSEY WAKEFIELD. The standard early variety. Heads pointed, of medium size and very hard. Our strain is particularly fine, the heads being very uniform and mature early			
.....	.30	.85	3.25
Charleston Wakefield. Larger and 10 days later than Jersey Wakefield. Heads larger around and not so pointed.....	.30	.85	3.25
COPENHAGEN MARKET. Special Strain. Very early. See description above40	1.00	3.75
ENKHUIZEN GLORY. A very large, early cabbage. Heads as large as late kinds and mature as early as Charleston Wakefield. Has proved to be a most profitable variety.....	.30	.70	2.50
Burpee's All Head Early. Heads of good size, deep, solid and heavy. Matures medium early. Largely used for main crop for fall market and shipping.....	.28	.70	2.50
Henderson's Early Summer. A fine early flat cabbage.....	.30	.80	2.75

CABBAGE—Late or Main Crop Varieties

For Fall Market or for kraut the medium early kinds are better than the very large late kinds. Harris' Summer Ballhead, Midseason Market and Enkhuizen Glory are excellent.

For late fall and winter market the Danish Ballhead is the most profitable. The Short Stemmed strain we offer yields more than any other of the Danish type, but is not as deep green as the Solid Emperor or Tall Stemmed strain, which has smaller heads and does not yield quite as many tons per acre. The Intermediate strain is halfway between the two, having shorter stems than the Solid Emperor and larger heads. It is a very fine Danish Cabbage.

Savoy cabbage is often a profitable crop for home market. Red Cabbage is also profitable on good, rich land.

"Proved Seed." Where we offer "proved seed" it means that the seed has been held until a crop of cabbage has been raised from it so we could see just what it would produce. New seed of the 1924 crop cannot be "proved" until the fall of 1925.

Types of Danish Ballhead Cabbage

	Solid Emperor			Intermediate			Short Stemmed		
	Oz.	¼ lb.	lb.	Oz.	¼ lb.	lb.	Oz.	¼ lb.	lb.
HARRIS' SUMMER BALLHEAD. Large, round, solid heads which mature medium early. One of the very best kinds for fall market or kraut	\$.40	\$ 1.25	\$ 4.25						
DANISH BALLHEAD, Solid Emperor Strain. A very fine strain of the genuine Danish Cabbage. Heads round (not flat) and deep green and very hard. Stems rather long. The best keeper.									
Proved Seed	.30	.75	2.75						
New Seed, not proved	.25	.70	2.25						
DANISH BALLHEAD, Intermediate. Has shorter stems and larger heads than the Solid Emperor and is of deeper green color than the Short Stemmed strain. A very fine strain.

New Seed, not proved	.25	.70	2.25						
DANISH BALLHEAD, Short Stemmed. Matures quicker than the Solid Emperor strain, has shorter stems and larger heads, but not quite as deep green color. Proved Seed	.30	.85	3.25						
New Seed, not proved	.25	.70	2.25						
Surehead. Deep, heavy heads. A good, late variety	.25	.70	2.25						
Succession. A popular cabbage for fall market	.25	.70	2.50						
All Seasons. Large flat heads	.25	.70	2.50						
Volga. The heads are large, round and solid; a heavy cropper	.30	.85	3.00						
Premium Flat Dutch. Old standard kind. Large, heavy head	.25	.70	2.50						
Winningstadt. Pointed heads of medium size	.25	.70	2.50						
RED DANISH STONEHEAD. A new red cabbage much like a red Danish Ballhead. Grows to a good size and heads evenly	.30	.90	3.50						
MAMMOTH ROCK RED. The largest red cabbage. Hard, round, deep red. One of the best red varieties for market or shipping.									
Proved Seed	.30	.90	3.50						
SAVOY, Perfection Drumhead. Heads large and quite firm; color deep green; keeps all winter	.30	.80	3.00						
SAVOY, Sutton's Best of All. Large heads, quite firm and of a light green color. Produces the largest heads of any Savoy we know of	.30	.80	3.00						

CAULIFLOWER

Snowball, of the best strain, makes large solid heads quite early. Danish Perfection has more leaves than Snowball which protects the head better. It is a week or ten days later than Snowball, and a little earlier than Danish Giant or Dry Weather, which produces large solid heads, but should be set out earlier. Large Algiers makes loose, flat heads of large size and of high quality, but not of the best form for market.

	Oz.	¼ lb.	lb.
Danish Giant Snowball or "Dry Weather." Ten days or two weeks later than Snowball and of more vigorous growth and stands drought better	¼ oz. 65c	2.10	7.50 28.00

CAULIFLOWER—Continued

	Oz.	¼ lb.	lb.
SNOWBALL, Perfected Strain. A very fine improved strain of the true Snowball type. The plant is dwarf and compact and the heads are large, solid, snow white, and with no protruding leaves when well grown under favorable conditions. Matures early but usually the best heads are obtained from plants set out rather late. The seed we offer is the very finest strain obtainable, 95% of the plants make good heads. There is no use in paying more for the seed than we charge, as no better seed can be obtained at any price. This is the plain truth which anyone can prove who will take the trouble to try our seed by side with seed costing twice as much.....	¼ oz. \$.60	\$1.90	\$ 6.50
DANISH PERFECTION. A new strain of Snowball Cauliflower with more leaves to cover the head, which does away with tying to some extent. Heads very solid and without protruding leaves. Matures a week later than Snowball	¼ oz. .60	2.00	6.75
ERFURT EARLY DWARF. Madsen's Stock No. 3. Much like Snowball, but has somewhat shorter stems. A very fine strain	¼ oz. .60	1.90	6.50
Large Algiers. Large, rather loose heads, but of fine quality.....	1.35	3.50	24.00

CARROTS

Carrots often prove very profitable. They do best on muck or soil of that nature, although very good crops are raised on sandy loam. For late fall market the seed is usually sown in June or first of July. If small carrots for bunching are wanted the seed may be sown as late as August 1st in the north and later further south. It requires 2 to 4 lbs. of seed for an acre, depending upon how far the rows are apart.

Chantenay is considered the best variety for market or table use. The roots grow very smooth and not too long. Danvers Half Long grows an inch or two longer and yields more, so is preferred when the crop is to be used for feeding stock. Coreless or Amsterdam Forcing is of fine quality for table use.

Oxheart makes a nice short, thick carrot for bunching. Early French Short Horn is very short, but grows rapidly and is best for forcing. All of these varieties are deep orange in color.

Chantenay

Danvers

	Oz.	¼ lb.	lb.
CHANTENAY. The most popular market variety, six inches long, stump-rooted, deep orange color and very smooth.....	\$.12	\$.30	\$ 1.00
DANVERS' HALF LONG. Grows about 8 in. long, deep orange color all through; not quite as smooth as Chantenay. A heavy cropper and valuable for stock feeding and market.....	.12	.30	1.00
CORELESS or Amsterdam Forcing. The carrots grow about 5 to 6 in. long and 2 in. through and the same size the whole length. The end is blunt and with very fine rat-tail root. The color is deep orange red all through the root including the core, hence the name "coreless" as the small core is inconspicuous. This is a beautiful carrot for bunching or to market in bulk.....	.15	.40	1.50
HUTCHINSON. A very fine carrot, 8 to 9 in. long nearly the same size the whole length and stump-rooted. Color deep orange and quality is fine.....	.25	.75	2.75
OXHEART or Guerande. Short, thick carrots, used for bunching and table use. Very easily pulled. About 4 inches long, deep orange yellow, and of fine quality12	.30	1.00
MASTODON or WHITE VOSAGE. Large, white carrot for stock feeding. Immense yielder. 8 to 10 inches long.....	.10	.20	.70
Long Orange. Roots a foot long, yields large crops.....	.12	.25	.90
Early French Short Horn. For forcing. About 3 inches long; very early20	.50	1.75

CELERY

An ounce of seed will produce about 8,000 plants. It requires 20,000 plants to the acre. For very early planting the seed should be sown in February or first of March. For late crop the seed is sown in the open ground as early as possible. Great care must be taken not to cover the seed too deep. More failures to get the seed to germinate are due to this cause than any other.

Two-thirds of all the celery grown is Golden Self-Blanching, or "Paris Golden," which is the same thing. This is the most profitable variety for market up to January. For later use, the green varieties should be used. Easy Blanching blanches quickly and can be marketed early. French's Success is one of the very best for late winter market and keeps longest.

Strains of Golden Self Blanching. There are now several distinct strains of this variety. A prominent French grower developed a year or two ago a new strain which is quite different from the old type. The stalks grow taller and resist blight much better. Some growers, however, prefer the old strain with shorter and heavier stalks. On account of its rapid growth the new strain is undoubtedly the best type for the early crop, but for storing there seems to be a difference of opinion among growers. We rather think the new strain will keep just as well as old if properly grown.

Golden Self Blanching From Harris' Seed

Golden Self Blanching Celery

There are so many different strains and types of this popular variety that it is important that the grower should get the one best suited to his requirements.

Old Strain. The stalks are of medium height, large around and with heavy, well developed heart. Blanches very easily and is solid and crisp. We are able this year to offer "proved seed" from which a crop of celery has been raised, so we know just what the strain is. We have never seen a better stock. The stalks are of strong healthy growth with well developed hearts. The stems are thicker and more solid than usual with this variety. The seed is of strong germination. Oz. 95c; $\frac{1}{4}$ lb. \$3.25; lb. \$12.00.

New Strain. Grows much more rapidly than the old strain and resists blight much better. The stalks are taller and the heart not quite as heavy. When planted 8 to 10 inches apart in the row the stalks develop properly, forming a good heart which they do not do if planted too close together. For early crop this is superior to the old strain. For the late crop we advise setting the plants rather late so the celery will not get too large. Oz. 95c; $\frac{1}{4}$ lb. \$3.25; lb. \$12.00.

EASY BLANCHING or Sanford Superb Celery

We find this new celery a first-class variety to follow Golden Self Blanching. It is of the same dwarf, compact habit of growth, blanches easily and quickly, and is of fine quality. The leaves are green and the stalks pure white when blanched. It is superior to the Golden Self Blanching in keeping qualities. We have kept a lot of it in good shape until spring, and set it out for seed. The celery has very heavy stalks, blanches easily, and is perfectly firm and solid. The strain we offer is very carefully grown and is far superior to the California seed usually sold. We highly recommend this strain. Oz. 95c; $\frac{1}{4}$ lb. \$3.25; lb. \$12.00.

Photograph showing a stalk of Golden Plume (left) and Golden Self Blanching (right) after being in common storage until March 15th.

Golden Plume Celery

Also Called "Wonderful"

This new celery will undoubtedly largely supersede the Golden Self Blanching when it is better known. It is of the same color and general appearance but of more vigorous, sturdy growth, forming heavy, solid stalks which blanch quickly and are of fine quality.

A photograph reproduced here shows how much better the Golden Plume keeps than Golden Self Blanching. Both were stored in a cellar from Nov. 1st to March 15th. While the Golden Self Blanching was all rotted down the Golden Plume was in fairly good condition. In good storage it will keep in perfect condition much later in the spring.

We advise all growers of celery to try this strain. There are never any soft stalks and the celery is large, vigorous and healthy and keeps well in storage.

The photograph reproduced here shows the superior keeping qualities of the Golden Plume.

We offer a very fine strain from carefully selected stock plants. $\frac{1}{4}$ oz. 75c; 1 oz. \$2.50; $\frac{1}{4}$ lb. \$8.00; lb. \$30.00.

A large celery grower of Fulton, N. Y., writes January 9, 1923:

"Our celery raised from your seed (New Strain) excelled anything raised in this country. We took to market some measuring three feet high without roots, weighing 42 lbs. per dozen. _____'s agent was here and bought four heads of celery from your seed to put in their seed house to show. It was the talk of Syracuse, Fulton, and Oswego where I marketed it."—A. J. Best.

FRENCH'S SUCCESS CELERY

We do not know of any green celery quite equal to French's Success. The stalks are of good length, very thick, firm and brittle. When grown from our selected seed there are no soft stalks.

The keeping qualities of this celery are remarkable. It is not difficult to keep it in good condition until March. It is a better keeper than Columbia, and heavier, more uniform and more solid than Winter Queen and Giant Pascal.

Beware of seed of this variety offered by other dealers. We know by our trials that all of it is far inferior to our own original strain, which we got from Mr. French himself over 20 years ago. Oz. 90c; $\frac{1}{4}$ lb. \$3.00; lb. \$11.00.

Harris' Perfection Cucumber (Photograph)

CUCUMBER—Harris' Perfection Cucumber

This variety has been selected for many years with the idea of getting a cucumber as near perfection as possible. The fruit is long, straight, smooth and handsome. The color is deep green with clear white rays on the blossom end. The cucumbers retain this deep green color longer than any kind we know of. The fruit will average over a foot long when matured and many reach 15 inches in length.

The vines are vigorous and resist blight well. This is a White Spine variety and is one of the very best of this class. The fruit matures as early as the short kinds and are far superior to them. Our seed is so carefully bred that practically every cucumber is of almost perfect shape. See price below.

CUCUMBER

	Oz.	¼ lb.	lb.
Harris' DOUBLE YIELD Pickle. A new kind that yields double the number of pickles produced by other varieties. For description see our general catalogue, page 5. Pkt. 15c	\$.75	\$...	\$

Lemon Cucumber25

IRONDEQUOIT HOTHOUSE CUCUMBER

The gardeners around Rochester have developed a very fine hothouse cucumber that has proved the most profitable variety to raise under glass.

The fruit is long, slender, deep green and nearly perfectly solid, there being very few seeds, and in some fruit none at all.

The vines are wonderfully vigorous and very prolific.

The seed we offer was saved entirely from fruit grown under glass. Packet of 50 seeds 60c; 100 seeds \$1.00; 500 seeds \$4.00.

SWEET CORN

ALPHA—The Earliest Sweet Corn

Again the Alpha corn has proved to be the earliest in our trials. These trials included all the very earliest kinds we could get together. The Alpha was ready to pick three days before any other kind, except one very small black corn of no commercial value.

The ears are 5 to 6 inches long with 8 rows of large white kernels and has a white cob. The stalks are only 4 to 5 feet high.

Owing to its extreme earliness the Alpha has proved a profitable corn for the market grower. With this variety it is perfectly possible to get corn on the market 4 days to a week earlier than anyone else and get the high prices that are always paid for the first corn. Lb. 35c; 12 lbs. (peck) \$2.90; 25 lbs. or more 23c per lb.

HARRIS' MAMMOTH WHITE CORY

There are many varieties of Sweet Corn claimed to be the earliest. We have tried every kind we could get the seed of and planted it side by side with our strain of Mammoth White Cory on the same day. No kind has matured earlier except the new "Alpha" which has smaller ears.

Harris' Mammoth White Corn has good, large ears 6 to 7 inches long, 10 to 12 rowed, pure white and of fine appearance.

The stalks are small but often carry two large ears which grow quite low down. This corn is "Mammoth" only in the sense that it has much larger ears than the old Cory Corn.

It is a profitable corn to raise because it gets on the market before any other kind having ears equally large, and always brings the highest price. It has sold as high as \$1.00 per doz. on the Rochester market. Seed of our own raising, selected for earliness and large 10 rowed ears. Lb. 28c; 12 lbs. (peck) \$2.40; 25 lbs. or more 19c per lb.

GOLDEN BANTAM—Special Strain

We can offer this season an improved strain of Golden Bantam having longer ears and more vigorous stalks than the usual strain. The ears are strictly 8-rowed and average nearly 2 inches longer than the usual type. This strain has been carefully bred for years to get a larger ear and more vigorous stalks, and we are sure gardeners will find it superior. Lb. 28c; 12 lbs. (peck) \$2.25; 25 lbs. or more 18c per lb.

WHIPPLE'S EARLY SWEET CORN

The Largest Early Variety

Looks like Evergreen and is as early as Cory.

Since we first introduced the corn in 1919 it has gained steadily in popularity and we have never had enough seed to supply the demand. Every gardener who raises it finds it profitable.

To describe it briefly it is like Stowell's Evergreen in size and shape, but matures very early—as early as Pocahontas and Red Cory, much earlier than Kendel's Early Giant, Metropolitan, Golden Bantam, etc. The quality of the corn is far superior to Evergreen, the corn being sweet, tender and delicious.

A profitable market variety—Think of putting on the market a big 16-rowed ear of corn as early as others are bringing in Cory! It sells on sight and at top prices. Fully half the stalks have two large ears even when planted quite close together. The yield therefore is immense.

In our opinion it is the most valuable early Sweet Corn ever produced, and will take a prominent place in the list of varieties best suited for the market grower.

The ears are 7 to 8 inches long and very large around, as they have 14 to 18 rows of good size kernels. Each ear is filled right out to the tip. The kernels are long and narrow like Evergreen.

Well-bred seed important. Gardeners should be careful from whom they buy Whipple's Early corn. We do not sell to other dealers. Our seed is raised from most carefully bred "stock seed" selected for earliness, size, and uniformity. Seed not so carefully bred will soon cause the corn to run down and become late. The greatest care must be used to keep the earliness without losing size. The only safe way is to buy headquarter seed. We had a large number of acres of this corn so think we have enough this year to supply what our customers require.

Lb. 35c; 12 lbs. (peck) \$2.75; 25 lbs. or more 22c per lb. EARS, \$9.00 per 100 ears.

What Gardeners Say About Whipple's Early Corn

"Your Whipple's Early corn is a fine thing. It proved as early as Cory and the ears are twice as large."—Eugene Thayer, Bowie, Md.

"The Whipple's Early Corn which we planted May 14th had some fine ears fit for use July 4th."—Mrs. A. Duke, Muskogee, Okla.

"Your Whipple's Early Corn can't be beat. The Golden Bantam corn stands high, but after I make one sale of Whipple's and they try it, it is clear sailing. I shall plant more next year. I am much pleased with the seeds I received from you."—Cassander Gilmore, Raynham, Mass.

"I was pleased with Whipple's Early Sweet Corn. Had ears 74 days from planting that weighed one and one-half lbs. each."—Fred Griffin, Hamburg, N. Y.

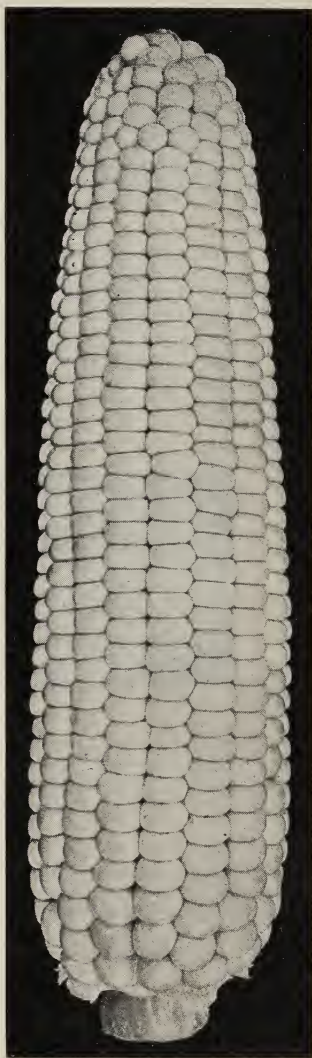

"I planted two quarts of your Whipple's Sweet Corn last year along side of Early Fordhook and at the same time and on the identically same ground, and believe me, I was surprised when the Whipple Corn with its big ears was ready to pull the same day the Fordhook corn was. And such a contrast in the size of the ears of corn! It will certainly make friends for you wherever you sell it."—L. W. Humpton, Coatesville, Pa.

"I take this opportunity to congratulate you and Mr. Whipple upon Whipple's Early Sweet Corn. With me it has ripened about with Golden Bantam, but it is eared much heavier, and the ears are twice as large. The quality is equal to Country Gentleman and is two or three weeks earlier. It is the best all-around corn that I have tried for Northern latitudes."—L. E. Johnson, Richfield Springs, N. Y.

"We grew 10 rows of Whipple's Early Corn this season from your seed. The rows were 70 rods long and 42 in. apart. I drew 900 dozen to Rochester market at 20c per doz. (\$180.00) sold balance to canning factory about 10 days later and received \$110.94. If you have any kind of corn that will compare with this, would be delighted to hear from you."—M. H. Watrous, Lyons, N. Y., Nov. 10, 1924.

These 10 rows occupied only three-quarters of an acre. Receipts were \$290.94 or at the rate of \$387.92 per acre.

"I am free to say after using Whipple's Early Sweet Corn for three years that I consider it in a class so far ahead of other early varieties of Sweet Corn that there is no comparison. As a money maker no Sweet Corn can equal it."—F. W. Corey, Newburgh, N. Y., Nov. 25, 1924.

Whipple's Early Sweet Corn

SWEET CORN WHIPPLE'S NEW YELLOW

Earlier than Bantam and as large as Evergreen

This is a wonderful early yellow corn that has proved very profitable to raise for market. The ears are very large, 8 to 9 inches long, having 14 to 16 rows of deep kernels. They mature ready for use three to four days earlier than Golden Bantam. The quality of the corn is very fine, but possibly not quite as sweet as Buttercup.

Its large size and earliness make it a most profitable market variety. The ears are of the same type as Whipple's Early and mature at about the same time. This variety was introduced by us three years ago and has become so popular and proved so profitable as a market corn that other seedsmen are offering inferior strains as Whipple's Yellow. To keep its earliness, size and quality requires the greatest care in selecting the corn from which to raise seed instead of using the whole crop as is done by most growers. The only safe way is to buy seed direct from headquarters. Many of our customers were disappointed in not getting this corn last season, as we did not have nearly enough to supply the greatly increased demand for it. This year we raised a large acreage and hope to have enough to fill all orders. **Lb. 35c; 12 lbs. (peck) \$3.00; 25 lbs. or more 24c per lb. EARS, \$10.00 per 100 ears.**

"The Whipple's Yellow corn I got of you last spring was ready ahead of Bantam and both were planted the same day. I would have made money by buying all my corn from you."—Jack O'Brien, North Troy, N. Y. Oct. 3, 1923.

"It may be of interest to you to state that I planted Whipple's New Yellow corn on May 19th and picked good full ears on July 24th. Quality delicious. A wonderful variety for the market gardener."—H. W. Leggett, Schuylerville, N. Y.

Whipple's Yellow Golden Bantam
Photograph showing comparative size

BUTTERCUP SWEET CORN A Larger and Better Bantam

The market in many cities now demands a yellow Sweet Corn of the Golden Bantam type. The Bantam is small and does not yield well. In the Buttercup we have a corn that resembles the Bantam very closely, but has ears that are much larger and yields much more and it matures at the same time as Bantam. The quality in our opinion is fully equal to Bantam or any other corn. It evidently contains much more sugar and is therefore sweeter than other varieties.

The demand for yellow Sweet Corn is increasing every year and it always brings higher prices in the larger cities than white corn.

After trying practically all the different kinds of yellow Sweet Corn now being offered we are convinced that Buttercup and Whipple's New Yellow are superior to any other yellow varieties that mature as early.

The Buttercup is really an improved Golden Bantam with larger ears which mature just as early. It always sells better than the small ears of Bantam.

The ears are 8 to 10 in. long and have 8 to 10 rows. Many stalks produce two ears.

We offer seed of our own raising. It is of a "thoroughbred" strain and the germination is perfect. **Lb. 30c; 12 lbs. (peck) \$2.40; 25 lbs. or more 19c per lb. EARS, \$8.00 per 100 ears.**

Buttercup Sweet Corn

"Your Buttercup sweet corn is the sweetest and the best seller of any corn I ever grew. Every customer asks for Buttercup so I will grow nothing else."—J. S. Warner, Otsego, Mich.

SWEET CORN

Our sweet corn is very carefully cured and is of strong vitality. The percentage that germinates in our tests is marked on the label of each lot we sell, so the planter can tell just how thick to plant. It requires 12 to 15 lbs. to plant an acre.
 Note: 25 lbs. of one variety will be supplied at the 100 lb. rate. A bushel weighs 40 to 50 lbs., depending on the variety.

	Lb.	12 lbs. (Peck)	100 lbs.
ALPHA. The earliest variety. See page 12	\$.35	\$ 2.90	\$23.00
WHIPPLE'S EARLY. A wonderful early corn. See page 13	.35	2.75	22.00
WHIPPLE'S YELLOW. A grand new early yellow corn. See page 14	.35	3.00	24.00
EARLY MAYFLOWER. Extra early; pure white corn of fine quality. Ears of good size and 10 to 12 rowed	.25	1.90	15.00
HARRIS' MAMMOTH WHITE CORY. The earliest Sweet Corn with larger ears and one of the most profitable for market	.28	2.40	19.00
POCAHONTAS. Extra early, large ears, white cob; as early as Red Cory and much larger and of finer quality. We consider this one of the best early Sweet Corns. Many of our customers have found it a very profitable variety to raise	.25	1.90	15.00
MIMMS' HYBRID. One of the best and most prolific medium late kinds. The ears are 9 to 11 inches long and have 10 to 12 rows of pure white kernels of fine quality, matures a little earlier than Evergreen. Crop of seed failed.			
GOLDEN GIANT. A good yellow corn to follow Bantam as it matures a week later and has larger ears, 12-rowed, and the corn is of high quality	.30	2.40	19.00
BUTTERCUP. The sweetest and best flavored corn we know of. Kernels golden yellow; ears much larger than Golden Bantam, and quality equally good or better. Matures medium early. See page 14	.30	2.40	19.00
GOLDEN BANTAM. Small, medium early, kernels yellow and of fine quality. We have a fine pure-bred strain of this corn which is far superior to most of the Bantam Corn sold	.28	2.25	18.00
HOWLING MOB. Large 12 to 14 rowed ears, medium early and of good quality. A popular market corn	.25	1.90	15.00
Crosby's Early. Medium early, very prolific, and of good quality	.25	1.80	14.00
Black Mexican. Of very fine quality	.25	1.90	15.00
HICKOX IMPROVED. Very large ears, longer than Evergreen and earlier than that variety and of finer quality. A profitable market variety	.30	2.50
EARLY MAMMOTH. Earlier than late Mammoth, with immense ears. Matures with Evergreen and has much larger ears	.30	2.50
LONG ISLAND BEAUTY. A late corn with immense ears, often over a foot long and 7 to 9 inches around, 16 and 20 rows of pure white kernels that are of fine quality. A profitable late market corn	.30	2.50	20.00
Burpee's White Evergreen. A very fine strain of Evergreen corn with larger ears which are very white and attractive in appearance. Matures late	.35	2.75	22.00
STOWELL'S EVERGREEN. The standard late corn. We have a very fine strain grown in this neighborhood that is earlier and better than western-grown seed	.30	2.50	20.00
Country Gentleman. Late; small ears, of fine quality	.30	2.50	20.00
NOTE. 25 lbs. or more of any kind will be supplied at the 100 lb. rate.			

POP CORN

A bushel weighs 56 lbs. 10 lbs. will plant an acre.

"FRENCH ENDIVE"—WITLOOF CHICORY

This is a crop that can be grown during the winter in a dark place and at very little expense. There is a growing demand for "French Endive" in the markets of all the large cities.

Directions for culture will be sent to any one interested, without charge.

Seed. Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. 90c; lb. \$3.25.

Roots—Price on application. Please state quantity required.

NOTE. We do not sell half ounces unless the price per ounce is 30c or over.

EGG PLANT

Black Beauty Egg Plant

Black Beauty produces fruit of good size and of deep purple color, and is the most popular market variety. New York Improved is very similar, but the plant grows a little taller and the fruit matures a little later. In sowing Egg Plant seed care should be taken not to cover it more than $\frac{1}{4}$ in. deep, and to keep the temperature from 70 to 90. The plants require considerable room and are usually set in 3 in. pots. They are often injured by bugs, to prevent which it is a good plan to spray with arsenate of lead and lime even before the plants are set in the open ground. Plant in rows 3 feet apart each way.

This is a profitable crop where there is a good market. The plants do best on rather light, rich soil. In the North the seed should be sown in March and the plants set out the last of May. An ounce of seed will produce about 2,000 plants.

Note—Special prices will be made on orders for plants in considerable quantities placed early in the season so they can be raised especially for the order.

LEEK

Large American Flag. The most popular variety12	.40	1.50
--	-----	-----	------

LETTUCE

For forcing May King is an excellent head variety. It will stand more heat than Big Boston, and matures quicker. Big Boston is fine for cool houses and cold frames. For a curly leaf lettuce Grand Rapids is by far the most popular. Grows rapidly and the leaves stand upright so can be planted close.

For summer planting in the open ground, Iceberg, Unrivald, Salamander, Holyrood Hot-Weather and Deacon are good. Big Boston is most largely grown on muck land for both early and late crops.

Romaine or Cos Lettuce can be grown both in the hothouse and open ground and is in good demand in many markets. Trianon Self-Folding is the largest kind; the heads often being nearly a foot high. Eclipse is shorter and forms the head earlier. Both do best in cool weather.

"Profiteering." Some seedsmen have taken advantage of the short crop lettuce seed in California to put the price up much higher than we consider justified. There is really no great shortage of seeds, except of a few varieties, and we shall be pleased to supply our customers with what they require at the prices quoted in this list as long as our supply lasts.

Harvesting Harris' Selected Big Boston Lettuce on the Gardens of J. H. Snyder, Sodus, N. Y.

SELECTED BIG BOSTON LETTUCE

Our strain of this lettuce is exceptionally fine. Heads uniformly solid and compact, and stand a long time without bolting. Some of the largest growers in this country are using Harris' Big Boston and find it equal if not superior, to any other stock obtainable at any price. Oz. 15c; $\frac{1}{4}$ lb. 50c; lb. \$1.75; 5 lbs. or more \$1.65 per lb.

Mr. F. M. Hull, Red Creek, N. Y., writes:

"The Big Boston Lettuce I received from you this spring was the best I ever had. Only one plant not true to name in the whole piece.

Mr. Roy L. Smith, a large grower at Cato, N. Y., writes:

"I sowed two acres with your Big Boston last fall and every one that saw it said it was the finest piece of lettuce they ever saw. It was the finest I ever raised."

Mr. M. E. Kerwin, an extensive lettuce grower of South Lima, N. Y., writes:

"Your Big Boston lettuce has done fine for me. About 50 members from Cornell University were in South Lima one day last summer and they told me your lettuce was the nicest stock they had seen there."

"Your Big Boston was the finest I ever grew. There was no lettuce like it on the market."—I. Kreigsmann, Elizabeth, N. J.

	Oz.	$\frac{1}{4}$ lb.	Lb.
MAY KING. A very early head lettuce for open ground or forcing	\$.20	\$.65	\$ 2.50

HOLYROOD HOT-WEATHER. Large, firm heads. Stands well in the summer and is very slow to run to seed	.18	.45	1.60

COS or ROMAINE, Trianon Self-Folding. Used for forcing and open ground. Large, long heads of fine quality	.18	.60	2.00
---	-----	-----	------

Cos, Eclipse. Forms compact heads very early. A valuable variety for forcing as well as the open ground. Every plant makes a nice firm head	.18	.60	2.00
---	-----	-----	------

MUSKMELON or Cantaloupe

Nearly every market wants a different muskmelon. Rocky Ford and Paul Rose are probably the most popular in many markets, and are excellent melons for shipping. Admiral Togo is an improved variety of this class and better than the older types. Hoodoo or "Hearts of Gold" is another good one of this class; small, firm, heavily netted and deep yellow flesh of high quality. Osage is in demand in some cities and is a large, handsome, round melon of high quality and good for near-by markets. Bender's Surprise is now the most popular of the large melons. It is very firm and keeps a long time after picking and is of the highest quality. Emerald Gem is small, but very early and of high quality. It is not good for shipping.

BENDER'S SURPRISE MUSKMELON

A Grand Melon for both Shipping and the Home Market

We have raised muskmelons for many years, but have never seen a melon quite equal to the Bender in fine flavor, size and keeping qualities combined.

The melons are round to oval in shape, ribbed and partly covered with netting. The flesh is very thick, especially so at the blossom end so that the melons rarely crack.

When ripe the melons turn a golden tint which shows through the netting and gives the fruit a very attractive appearance.

The size of the melons averages quite large, many weighing 10 lbs. and more. We have had melons that weighed 16 pounds.

A valuable point about these

Bender's Surprise Melon

melons is that they will keep in good condition five or six days after picking, and actually improve in flavor during that time. The flesh is so firm and thick that the melons remain firm and in good condition much longer than other large melons of this class. For market and shipping this is an important consideration.

We offer seed of our own growing of a very fine strain. The crop was almost an entire failure the past season so we have very little to offer.

We also offer seed grown for us which we consider as good as any obtainable, except our own growing.

	Oz.	¼ lb.	Lb.
GOLDEN CHAMPLAIN or Lake Champlain. The earliest melon.			
Small, round, green melons with yellow flesh.....	\$.50	\$ 1.75
IRONDEQUOIT. Large, round, netted; yellow flesh. A fine strain of the well-known Surprise melon.....	.20	.55	2.00
BENDER'S SURPRISE. A grand melon. See description above.			
Seed of our own growing. Crop very short.....	.65	2.25	8.00
Bender's Surprise. First class seed of a fine strain but not of our own growing.....	.25	.70	2.50
EXTRA EARLY KNIGHT. A very early melon popular in markets where known. The fruit is of medium size, oval in shape and well netted. The flesh is green and is sweet and of good flavor.....	.15	.40	1.50
HEARTS OF GOLD. A fine melon for shipping in baskets—medium in size, round and well netted. Flesh orange yellow and of high flavor. Very firm and holds up well for a long time after picking.....	.15	.40	1.50
ADMIRAL TOGO. Oval, netted; flesh yellow and of finest flavor. Very prolific, medium size, slightly larger than Rocky Ford.....	.15	.40	1.40
Miller's Cream, or Osage. Oval, dark green, slightly netted, yellow flesh of fine flavor. A very fine melon and a profitable one for market.....	.12	.35	1.30
OSAGE, Perfected Strain. A very carefully bred strain of Osage melon which is 10 days earlier than the old type and the fruit is almost as large and is more uniform in shape and quality. This is a fine melon and will prove very profitable on account of its earliness and fine quality.....	.20	.50	1.75

MUSKMELONS—Continued

	Oz.	¼ lb.	Lb.
EMERALD GEM. Small, round, green, slightly netted, yellow flesh of finest flavor; very early and prolific	\$.15	\$.40	\$ 1.40
PAUL ROSE. Fruit of medium size, oval, netted and very firm. Flesh orange yellow and of high quality. A valuable melon for market and shipping15	.35	1.25
ROCKY FORD (Netted Gem.) Small, oval, netted, green flesh10	.30	1.10
DELICIOUS GOLD-LINED ROCKY FORD. A very fine improved strain of the Rocky Ford melon. The flesh is green but has a yellow tinge about the seed cavity making it very attractive when cut15	.45	1.60
Hackensack. The standard, large netted, green flesh melon12	.35	1.25
Honey Dew. A melon that will keep two months after picking. It is shipped to eastern cities from California and the Southwest where it does well. It does not succeed here15	.40	1.50

WATERMELON

Harris' Earliest, Cole's Early, and Ice Cream or Peerless are valuable for the North because they will ripen before frost.

For places south of New York City, Tom Waston and Kleckley Sweets are better because they are longer and of high quality.

	Oz.	¼ lb.	Lb.
HARRIS' EARLIEST. The earliest large melon of good quality. One of the best varieties for the North	\$.10	\$.25	\$.75
Halbert Honey. Long, dark green, flesh red and of finest quality. Medium early08	.20	.70
COLE'S EARLY. Very early and of good quality10	.25	.75
IRISH GRAY. Long, light green, very large with a tough shell and firm bright red flesh of fine quality08	.20	.60
TOM WATSON. The most popular melon for shipping. Fruit long, medium green with lighter markings. Rind strong so the melons stand shipping well08	.18	.55
KLECKLEY SWEETS. Long, deep green, attaining a large size and of fine quality. One of the best kinds. Our Northern grown seed is superior to Southern grown. Seed saved from the best melons only08	.18	.55
Mountain Sweet. A large, medium early melon08	.18	.50
Ice Cream or Peerless. One of the best early varieties. Large, light green, early and of fine quality08	.20	.70

GREEN CITRON, or Colorado Preserving. (Green seeds.) Used for preserves10	.20	.60

MUSTARD

FORDHOOK FANCY. Finely cut and curled leaves, very ornamental12	.25	.90
Giant Southern Curled. Very large08	.20	.70
White London. The seed is used for flavoring pickles08	.15	.50

ONIONS

For market and storage a globe-shaped, yellow onion is usually preferred, although for some markets a red onion sells best. Yellow Globe Danvers is nearly round. Ohio Yellow Globe is slightly flattened on the bottom, and Southport Yellow Globe is more pointed at the bottom, forming an oval shape rather than perfectly round. The Danvers and Ohio strains are a little earlier than the Southport and are the most popular varieties. Round Yellow Danvers is flatter than the Globe and matures earlier. Prizetaker is larger than the Globe Danvers and a little later.

Ebenezer or "Japanese" is a flat yellow onion that keeps the year around. It is especially valuable for raising large onions early in the summer from sets.

For pickles Early Barletta is best. The seed should be sown very thick so the onions will be small and the yield heavy.

Special prices will be quoted on large lots of Onion Seed. Please write us stating what kinds and quantities you want.

Note.—Our Onion seed is all tested for germination before it is sent off, and the per cent that germinates is marked on the label. We should be glad to give results of our tests to any grower who is interested.

	Oz.	¼ lb.	lb.
YELLOW GLOBE DANVERS, Harris' Selected Strain. Our seed of this variety is grown from very carefully selected bulbs, and will be found much superior to the seed usually sold. It produces bulbs of uniform globe shape, deep yellow color and with small tops	\$.15	\$.40	\$ 1.50

ONIONS—Continued

	Oz.	¼ lb.	lb.
OHIO YELLOW GLOBE. A very fine strain of Yellow Globe Onion especially suited to muck land. The onions are globe shaped, but a little more flattened on the bottom than the Globe Danvers or Southport	\$.15	\$.40	\$ 1.50
ROUND YELLOW DANVERS. Earlier and flatter than Globe Danvers15	.40	1.45
SOUTHPORT YELLOW GLOBE. A very fine strain of this onion grown from perfect globe-shaped bulbs of deep yellow color15	.45	1.60
PRIZETAKER. Large yellow onion of very handsome globe shape and mild flavor. Does not keep as well as Danvers. Fine for fall market15	.40	1.60
SOUTHPORT RED GLOBE, Harris' Special Selected. Large, perfectly round, deep red onion; keeps well and is the best red variety. Our seed is raised from carefully selected onions and will be found very fine.20	.50	1.90
Early Large Red. Large, flat, red onion. Matures early and yields well15	.40	1.50
LARGE RED WETHERSFIELD. Very large, deep red, flat.15	.40	1.50
Southport White Globe. The largest and finest white onion. The seed we offer is of extra fine strain.25	.70	2.50
EBENEZER or "Japanese." A very fine yellow onion that will keep all winter and is of mild, pleasant flavor. The onions are flattened and of a light yellow color. This onion can be raised successfully from seed or sets. On account of its high quality it commands high prices where known. We offer seed of our own raising from onions we know to be genuine Ebenezers.30	.85	3.25
Australian Brown. Will keep the year around; matures early. The onions are flattened, of a golden brown color, and of fine quality18	.40	1.35
WHITE PORTUGAL, or SILVER SKIN. Flat, white onion of mild flavor, early. Excellent for pickling.20	.60	2.25
EXTRA EARLY BARLETTA. The best small white onion for pickling. Our seed is the real Barletta onion, producing very small, round, white onions that mature very early.18	.50	1.75
GIANT GIBALTAR. This is the largest Spanish onion which is sold in our markets. The onions are almost perfectly round or globe shaped, bright yellow and of very mild flavor. They grow very large, often weighing a pound or more. Matures rather late and should have plenty of room to develop. Genuine imported seed30	.80	3.00
Mammoth Silver King. Very large white, flat onion used principally for bunching while green. Seed sown in the spring will make large bunching onions in July and August.25	.75	2.75

ONION SETS

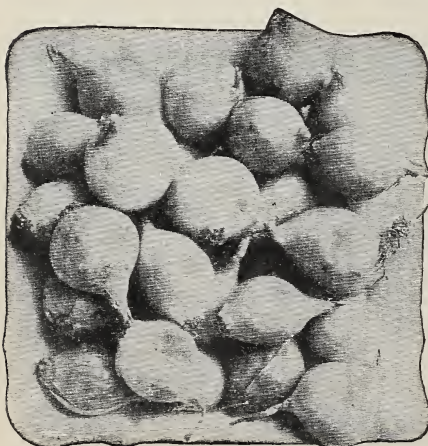

White sets make the whitest and most attractive bunching onions. The Yellow sets, especially the Ebenezer, are best to produce large dry onions for early use.

	Qt. (1 lb.)	Pk. (8 lbs.)	Bu. (32 lbs.)
Yellow Sets. Sound and clean	\$.25	\$ 1.20	\$ 4.25
White Sets. Silverskin30	1.50
Ebenezer or "Japanese" Sets30	1.50	5.00

Note—Prices subject to change. Please write for price if a considerable quantity is required. Crop very short this season.

OKRA or GUMBO

	Oz.	¼ lb.	Lb.
White Velvet. Smooth, light green pods of medium length	\$.10	\$.20	\$.60
Perkin's Long-pod. Long, green pods of the best quality10	.20	55

“Japanese” Onion Sets

In spite of the short crop of onion sets we can offer until sold a nice lot of genuine Japanese or Ebenezer sets at price quoted below.

These sets will produce large ripe onions in July or August when they always command high prices. These onions will keep all winter without sprouting. A very small percentage bolt to seed when raised from sets. In fact we have known a good many onions that refused to throw out a seed stalk even the second year after being raised from sets.

Gardeners find it much more profitable to raise onions from these sets than from seed unless they have exceptionally good onion land.

Peck (8 lbs.) \$1.50; bu. (32 lbs.) \$5.00.

This price is for early orders and is subject to advance later in the spring. Orders will be booked at any time for March shipment.

Harris' Model Parsnip—Every One a Model. Photographed Exactly as Dug

HARRIS' MODEL PARSNIP

We have been improving the old Hollow Crown parsnip by careful selection for some years until we have obtained a very fine strain which we call “Harris' Model.” The shape is shown in the photograph above.

The parsnips grow to a good length, but not too long. The roots are smooth, snow white, and have practically no side roots or prongs. Their whiteness is quite remarkable and gives the roots a very attractive appearance.

Our seed is grown from transplanted and very carefully selected roots and it will be found far superior to the seed usually sold.

From a very extensive gardener.

“We sold our crop of Harris' Model parsnips today. They were the finest we ever grew. They sold for \$1.25 per bu. unwashed at wholesale. I cannot say enough in praise of them.”—Leonard W. Brotzman, Binghamton, N. Y. April 10, 1923.

	Oz.	¼ lb.	lb.
Harris' Model	\$.12	\$.30	\$ 1.10
Long Hollow Crown. Long, smooth roots10	.25	.65

PARSLEY

	Oz.	¼ lb.	lb.

Champion, or Triple Moss Curled. Finely curled deep green leaves10	.25	.75
Extra Double Curled. Not quite as fine as the above08	.20	.70
Plain. Leaves not curled08	.20	.70

Turnip-rooted or Hamburg. Form large roots that are cooked as a vegetable. We have a fine variety called “Thick Sugar” with smooth white roots of the best quality. Far superior to the common variety in both shape and quality

.10 .20 .70

Hundredfold Pea—Natural Size (See next page)

PEAS

The very earliest peas like Alaska and Surprise have small pods, but Thomas Laxton, Acquisition and Gradus are only three or four days later and have much larger pods. Laxtonian and Hundredfold are two or three days later than Gradus and have still larger pods. Little Marvel matures a day or two earlier than Sutton's Excelsior and produces wonderful crops, but the pods are not as large, although of good size.

Duke of Albany and Alderman are strains of Telephone, but are better than the old type, having darker colored peas and large pods. Heroine is later and has long pods and is very prolific. Prizewinner is a little later than Telephone, has short heavy vines and very large, deep green pods, and is one of the best late varieties.

A NEW EARLY DWARF PEA—LAXTON'S PROGRESS

This new pea is like Laxtonian and Hundredfold but is **three or four days earlier**. The pods are equally large and well filled with deep green peas. Vines only 18 in. high and very prolific. See price on next page.

NOTE—We are now selling peas by weight only. A pound is about 1 pint, 15 lbs. equal a peck and 56 lbs. a bushel by measure. Any quantity over 30 lbs. will be supplied at the 100 lb. rate.

PEAS—Early Varieties

	Lb.	15 lbs.	56 lbs. (Bu.)	100 lbs.
Alaska. Very early, small pods. 2 ft.	\$.25	\$ 2.70	\$ 9.52	\$ 17.00

“HARRIS’ EARLIEST” SWEET PEPPER

The Earliest and Most Prolific Sweet Pepper

Gardeners who have trouble getting peppers that will produce a good crop of fruit early enough for the Northern States should try Harris’ Earliest.

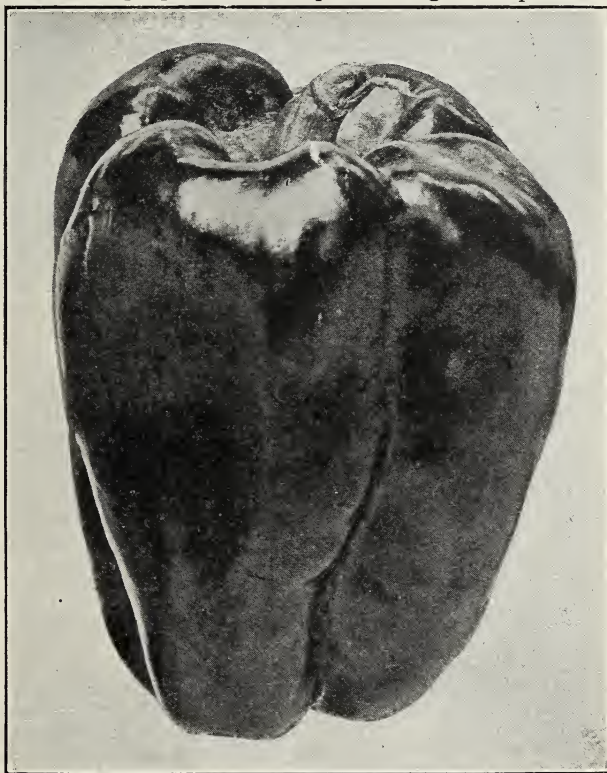

This is by far the earliest sweet pepper we know of. The fruit is of good size, resembling the Large Bell or Bull-Nose but unlike that variety is mild and sweet. The peppers are bright red when ripe and very firm.

The plants are of dwarf, compact growth and are literally covered with fruit, there being often a dozen large ripe peppers on a plant at one time and many green ones.

They can be set out closer together than other varieties and an immense number of peppers are produced on a small amount of land.

It always produces lots of fruit and is so early that the fruit gets ripe long before frost. With this new kind you can get peppers on the market before any other growers have them.

We are improving the size and shape of this pepper every year. It is now much larger and of better shape than it was two or three years ago.

“Harris’ Earliest” Sweet Pepper (Photograph Actual Size)

Some gardeners tell us that we do not say enough about this pepper. They say they get more peppers from 100 plants than from 500 of any other kind that bears sweet peppers.

Seed of our own growing. ¼ oz. 25c; oz. 75c; ¼ lb. \$2.75; lb. \$10.00

WHAT MARKET GROWERS SAY

“Harris’ Earliest peppers have been a veritable gold mine and I have never been able to make any other variety produce in this locality.” L. E. Johnson, Richfield Springs, N. Y.

“The Harris’ Earliest pepper I got of you is the earliest pepper I have ever seen. At this date, July 24th, the plants are loaded with large fruit and also full of bloom.” John H. Withey, Skaneateles, N. Y.

HARRIS' EARLY GIANT PEPPER

The Earliest and Most Prolific Large Pepper

We have at last developed a very large pepper that is not only early but yields large numbers of peppers on every plant. Hitherto all large peppers have been late and did not yield well in the North. By careful breeding a really remarkable result has been attained.

Harris' Early Giant has fruit that stands 5 in. high and 4 in. across. 21 peppers fill a 14 qt. basket and 45 completely fill a bushel crate. It is larger than Ruby King and Giant Crimson and a week earlier and much more prolific.

On a great many plants there are 10 to 12 large peppers and 8 or 10 smaller ones at one time. The yield is, therefore, immense.

Harris' Earliest pepper has been popular with gardeners ever since we introduced it, 10 years ago, and it will still continue to be grown in preference to all other kinds by people in the North who want extreme earliness and large yields and do not care for extra large size. Our New Early Giant, however, has much larger peppers and is a week or ten days later. The plants grow 18 in. to 2 ft. tall and produce such a large number of big peppers that there is hardly room for them on the plant.

Gardeners who want big peppers and lots of them should try the new variety.
 $\frac{1}{4}$ oz. 60c; oz. \$2.00. Any larger quantity will be supplied at the same rate, \$2.00 per oz.

Mr. H. I. Maddox, Merced, Calif.

"I saw your Early Giant pepper at Morse's trial grounds and will want some seed. It proved to be the earliest and most uniform of any, and just right for size."

PEPPERS

Giant Crimson, Magnum Dulce and Chinese Giant are very large peppers, but do not bear as well as the varieties with smaller fruit, such as Neapolitan and Harris' Earliest which are also earlier. Of the two, Giant Crimson is more prolific and earlier than Chinese Giant with just as large fruit. Ruby King and Royal King produce well and are very large peppers but somewhat late for the northern parts of the country. Harris' Earliest has fruit as large as Bull Nose and is earlier, more prolific and the fruit is mild and sweet. Of the pungent or "hot" peppers, Giant Cayenne is one of the best.

POTATOES

The potatoes we offer have been carefully inspected while growing and plants affected with mosaic, leaf curl or other diseases were promptly removed. It does not pay to use ordinary potatoes for seed. The crop can be almost doubled by the use of disease-free seed.

About Shipping.—The potatoes are shipped in sacks holding 150 pounds (2½ bu.) or barrels holding 180 lbs. (3 bu.) We can usually ship safely by the middle of March, but not before, except to the Southern States.

If seeds and potatoes are ordered, please state on the order whether the seeds are to be held to go with potatoes, or to be sent at once, and the potatoes later when it is safe to ship them. We cannot safely ship potatoes until the last of March.

Prices subject to change.—The prices here quoted are subject to changes of the market after March 1st and to our acceptance on receipt of order. Lowest prices will be quoted by letter at any time. Please state the kinds you are interested in.

Varieties.—Of the early kinds, Early Six Weeks, Early Ohio and Bliss' Triumph are the earliest and are light pink in color. Irish Cobbler is a very early white potato. Green Mountain is medium late and of finest quality. Golden Rural or Rural Russet is one of the best late varieties.

Bliss' Triumph

Early Ohio or Six Weeks

	Bu.	150 lbs. Sack
BLISS' TRIUMPH. One of the very earliest varieties and a heavy yielder. The potatoes are round and of a handsome deep pink color. This is the "Bermuda" potato shipped to northern markets in the early spring	\$2.40	\$ 5.00
IRISH COBBLER. The most popular round white early potato. Our stock is very fine, being pure and true to name. Grown from hill-selected and certified seed and practically disease-free. Crop yielded over 300 bu. per acre	2.00	4.25
Early Ohio. The standard extra early potato. Light pink, nearly round with blunt ends	2.00	4.25
Early Six Weeks. Of the Early Ohio class and resembles that variety closely. One of the very best extra early kinds. Grown from hill-selected pedigree seed	2.40	5.00
Spalding Rose. Large round potatoes of the Rose type. A heavy yielder but later than Early Rose	2.20	4.50
GREEN MOUNTAIN. A standard late potato of finest quality. Yields well in many localities, notably in New England. Crop inspected and certified and all diseased plants removed. This is really high class seed worth much more than we are asking for it	2.20	4.50
NUMBER 9 or Heavy Weight. One of the heaviest yielding late potatoes we know of. Round, white, medium shallow eyes, vines very strong and free from disease. Grown from certified seed and disease-free	1.50	3.25
GOLDEN RURAL or RURAL RUSSET. One of the very best late potatoes, almost blight-proof, vines very strong and vigorous and produce immense yields of handsome round, white potatoes. We think larger crops can be raised with this variety than any other kind with which we are acquainted. The two crops raised for us for seed yielded 350 and 409 bu. per acre. This seed is, as far as we could see by careful inspection of the fields, absolutely free from disease	1.50	3.25
Potatoes in barrels. —We can ship potatoes in wooden barrels holding 3 bu. (180 lbs.) if so ordered. The price of a barrel is three times the single bushel price. For example, if the bushel price is \$2.00, a barrel would be \$6.00.		

PUMPKIN

	Oz.	¼ lb.	lb.
SMALL SUGAR or Pie Pumpkin. Small, round, deep yellow and of good quality. Early and prolific.	\$.10	\$.25	\$.85
WINTER LUXURY. A little larger than Small Sugar, netted skin, light yellow, and of very fine quality. Keeps well.10	.25	.90
Mammoth Potiron, or King of Mammoths. Immense fruit, often weighing over 100 lbs. Color salmon pink, flesh deep yellow. Easily raised and a valuable pumpkin for market or stock feeding.15	.40	1.30
Large Cheese. Flattened, ribbed, mottled green and light yellow.08	.20	.60
Connecticut Field, or Big Tom. The common yellow field pumpkin.08	.20	.60

RHUBARB or PIE-PLANT

Myatt's Linnaeus. Early, large red stalks.15	.40	1.40
Rhubarb Roots. Good roots \$6.00 per 100			

RADISH

For forcing, Early Scarlet Globe and Harris' Special Scarlet Forcing are the most popular. The former is oval in shape, while the latter is round. Both grow very rapidly. Crimson Giant Globe is similar to Early Scarlet Globe, but grows larger and requires a little more time to mature.

For the open ground, Early Scarlet Globe is excellent. Earliest Scarlet White Tipped is very handsome and resembles French Breakfast, which is more oval in shape. Icicle is a fine long, white radish, smooth and of fine quality.

Philadelphia White Box is round, grows rapidly and is excellent for forcing and open ground. White Strasburg, Giant White Stuttgart and Delicacy are large, white radishes for summer and fall use.

Winter radishes are sown in July or August and used in the fall and winter. Chinese Rose is the best red variety. Long Black Spanish is also of fine quality.

	Oz.	¼ lb.	lb.
Earliest Scarlet Globe Short-leaf. Called also "Red Rocket," "20 Days" and "Startle." Oval shaped, of very rapid growth and good for forcing.	\$.12	\$.35	\$ 1.25
EARLY SCARLET GLOBE. The most popular variety for forcing and outdoor culture. Oval to round in shape, very bright red, flesh white, firm and crisp. Our seed is very fine, being grown from transplanted roots; especially good for forcing.10	.25	.90
Early Scarlet Globe. As usually sold. Good for open ground but not recommended for forcing.08	.20	.60
CRIMSON GIANT GLOBE. Very large forcing radish. Not so early as Early Scarlet Globe, but larger and stands longer without becoming pithy.10	.25	.90
Harris' Special Scarlet Forcing. Round, deep red, small leaves and extremely early. Valuable for forcing and the open ground.12	.30	1.00
EARLIEST SCARLET WHITE-TIPPED. (Sparkler). The radishes are round and are white on the bottom and part way up the sides. This is the finest strain of white-tipped radish.10	.25	.90
PHILADELPHIA WHITE BOX. A fine pure white, round, or ball-shaped radish for forcing or open ground. The radishes are handsome and of the best quality.10	.25	.90
DELICACY. A very fine white radish for summer or late fall use. Of globe shape, pure white and of fine quality. One of the best white summer varieties.10	.25	.85
ICICLE. Long, slim, white radish of very rapid growth. The best long white radish for forcing and in open ground.10	.25	.75
Long Scarlet Short Top. Excellent long radish for open ground.10	.25	.85
Chartier. Grows 4 to 5 inches long, bright red with white tips.10	.25	.90
French Breakfast. Oval, with white tips; early.10	.25	.80
White Strasburg. Large, long, white summer radish.10	.25	.85
Giant White Stuttgart. Very large, round or top shaped white summer radish.10	.25	.90

Winter Varieties of Radish

Sow in August and store in moist sand for winter market.

	Oz.	¼ lb.	lb.
Chinese Rose. About 5 inches long, red skin, with white flesh of best quality.	\$.10	\$.25	\$.80
Long Black Spanish. Skin black, flesh white and very solid, 6 inches long.10	.25	.75
Black Spanish Turnip. Round or turnip-shaped roots.10	.25	.85
California Mammoth White. Very large white radish; keeps well.10	.25	.85
CELESTIAL or Chinese White. Long, pure white, crisp and very mild.10	.25	.85

SQUASH—Summer Varieties

The Giant Crookneck, usually sells best in market, although Mammoth White Bush Scallop (called "Cymling" in the South) is in demand in many cities. The fruit is saucer-shaped and scalloped around the edge.

Italian Vegetable Marrow, called also "Cocozelle" (Italian—"Zucchetta nana de Milano"), is now in much demand. The fruit is long, mottled, dark and light green, and grows on a bushy plant without runners. It is used when half grown.

	Oz.	¼ lb.	lb.
Early Bush Crookneck. Most popular summer squash. Very early	\$.12	\$.30	\$ 1.10
GIANT BUSH CROOKNECK. Larger than the old Bush Crookneck and equally early	.12	.30	1.10
Mammoth White Bush Scallop. Large, flat, white fruit	.12	.30	1.00
Early Yellow Bush Scallop. Similar to the White, except in color	.12	.30	1.00
ITALIAN VEGETABLE MARROW. Long, mottled green fruit of high quality	.12	.35	1.20

Improved Warted Hubbard Squash

SQUASH—Fall and Winter Varieties

Boston Marrow and Prolific Marrow are the first to ripen and are excellent for market in the fall, but do not keep as well as the later varieties like Hubbard, Delicious and Quality, which can be kept all winter if put in a dry place where they will not freeze.

The Improved Warted Hubbard grows larger than the true Hubbard, and the shell is covered with lumps or "warts" making a squash that sells well in market, but we do not think the quality is quite as good as the true old Hubbard.

Delicious and Quality are both finer squashes than Hubbard, but do not yield quite as much and are profitable for market only where there is a demand for squash of high quality rather than size and appearance.

	Oz.	¼ lb.	lb.
QUALITY. A new winter squash, small in size, but of very fine quality—better than any squash we know of	\$.30	\$.70	\$ 2.50
Boston Marrow. Popular fall squash, deep orange color. Used principally for canning and pies	.08	.20	.70
Prolific or Orange Marrow. Very similar to above, but earlier. A valuable squash for canning or pies	.08	.20	.75
Essex Hybrid. Large, flattened at ends, thick flesh of high quality	.15	.40	1.40
DELICIOUS. Smaller than Hubbard, but of finer quality	.12	.30	1.25
HUBBARD—True. Smooth, dark green fruit of high quality	.12	.30	1.10
Improved Warted Hubbard. Larger and more warted than the true Hubbard	.12	.30	1.10
Golden Hubbard. Deep orange yellow	.12	.30	1.10
BLUE HUBBARD. A very large squash of the Hubbard type but the color is blue-gray. The shell is very hard and the squash keep a long time	.15	.40	1.40

Photograph showing two rows of King of Denmark Spinach between Victoria and Long Seasons. Note that both the latter have run to seed while the King of Denmark is still in good condition

KING OF DENMARK SPINACH

Those who have tried this new Spinach know it is a wonderful improvement over all other kinds. It not only grows fast and produces a large yield, but it stands two weeks longer before running to seed. The leaves are broad, heavy, dark green, and somewhat blistered like a Savoy cabbage. The remarkable thing about it is that it stands so long before putting up a seed stalk. This is a great advantage to the gardener, as he does not have to sell the whole crop within a few days as with other kinds.

The King of Denmark spinach resembles Long Season, but grows much larger than that variety and stands ten days or two weeks longer.

A letter worth reading—from Prof. W. A. Orton, U. S. Department of Agriculture, Washington, D. C., June 17, 1920.

"I write to compliment you on the spinach, King of Denmark, which you introduced this year. I find it of very exceptional merit as a long-standing spinach under our spring conditions. Planted March 25th on fairly fertile Norfolk sandy loam it was still in good condition on June 10th when the last was cut., with leaves covering nearly two feet of row, very tender and of superior quality. Two seedlings of Savoy spinach on the other hand have come up and gone to seed during the interval.—W. A. Orton, Pathologist."

Price of King Denmark Spinach for 1925. Oz. 8c; $\frac{1}{4}$ lb. 15c; lb. 45c; 10 lbs. or more 38c per lb.

Harris' Big Crop Spinach

This new variety is the earliest and largest spinach we have ever seen. It grows very rapidly and so is large enough to cut sooner than other kinds. The leaves are slightly blistered, very broad and fairly thick. Under favorable conditions the leaves often grow a foot long and half as broad.

Gardeners will find this a profitable early variety for spring sowing. It will yield immense crops and can be cut earlier than other kinds.

No seed of this variety has been sold to other dealers as we are offering the entire stock to our gardener customers this season.

Oz. 15c; $\frac{1}{4}$ lb. 30c; lb. \$1.00; 5 lbs. or more 90c per lb.

Harris' Big Crop Spinach

SPINACH

Norfolk or Bloomsdale Savoy-leaf has deep green blistered leaves, but runs to seed very quickly. It is used principally for fall sowing for which it is one of the best kinds. Long Season has similar leaves and stands much longer. The new "King of Denmark" is similar to Long Season, but is larger, stands up better and remains without running to seed much longer. Viroflay is a very rapid grower and has long, somewhat pointed leaves not as thick as Eskimo, which does not grow quite so rapidly, but stands a longer time and is darker green. Giant Crumpled Leaf grows very rapidly, has large broad round leaves, somewhat crumpled or blistered and is one of the best early kinds for spring sowing. The new "Big Crop" has still larger leaves but not as crumpled, and grows very rapidly. Victoria has round, very dark green leaves and stands well without running to seed. For wintering over, we recommend Eskimo, Norfolk Savoy-leaf and Victoria, all of which are hardy.

	Lb.	10 lbs. per lb.
Harris Big Crop. See description on preceding page	\$1.00	\$.90
KING OF DENMARK. Stands longer in hot weather than any other kind	.45	.38
ESKIMO or GIANT THICK-LEAVED. An improved variety with very large, thick, dark green leaves; grows rapidly and stands well without running to seed. Hardy and an excellent kind for wintering over	.35	.28
VICTORIA. Round, thick leaves, deep green and blistered. An excellent kind for spring sowing	.30	.25
Long Season. Very deep green, round thick leaves, Stands a long time without running to seed	.35	.30
GIANT CRUMPLED LEAF. Very large rounded leaves blistered or crumpled. Grows rapidly and yields large crops of very fine quality. A valuable variety. We highly recommend this spinach for spring sowing	.30	.28
Norfolk Savoy-leaf. Round, blistered leaves. One of the best for Fall sowing	.30	.25
VIROFLAY. Very large pointed leaves, rapid grower and comes on early	.30	.25
Long Standing. Round, deep green leaves	.35	..
NEW ZEALAND. Not a true spinach. Valuable for summer. Oz. 10c; ¼ lb. 25c	.80	.75

SALSIFY or VEGETABLE OYSTER

	Oz.	¼ lb.	lb.
Mammoth Sandwich Island. The largest and best variety	.20	.60	2.20

SORREL

Improved Broad-leaved	.18	.50	1.75
------------------------------	-----	-----	------

SWISS CHARD or SPINACH BEET

The Silver Leaf has smooth, light-green leaves with very broad, white ribs and is the most popular variety for market. Lucullus grows very large and has crinkled leaves. Both varieties are quite hardy and will survive the winter if given some protection.

	Oz.	¼ lb.	lb.
Silver Leaf. Large, green leaves with white ribs	\$.08	\$.20	\$.70
LUCULLUS. Very large crinkled leaves. Grows larger and is of better quality than the old kinds	.08	.20	.75

Harris' Thoroughbred Tomatoes

We have for years made a special point of raising high quality tomato seed. We raise the seed on our own farm and practice the most careful breeding methods to improve the strains.

BONNY BEST TOMATO

This tomato is much like the John Baer. Our selected strain has very smooth, handsome, bright red fruit of good size and well colored. Ripens almost as early as Earliana.

The fruit does not often crack and we did not see a single one affected with black rot in a large field we had growing at Moreton Farm.

One good point about this tomato which is not possessed by the John Baer is that the stem comes off the fruit when picked, so does not injure other tomatoes when they are packed together.

We are sure there is no finer strain of Bonny Best tomato than the seed we are offering this season. It was saved from very carefully bred plants and practically every fruit was of perfect color and shape. Oz. 40c; ¼ lb. \$1.25; lb. \$4.50.

Harris' Special EXTRA EARLY Strain of EARLIANA TOMATO

We are quite sure that all our customers who have raised our special strain of Earliana tomato will agree with us that it is the **earliest and smoothest and best colored** stock of Earliana obtainable. This is a good deal to say, but we have tried all the best strains of Earliana and cannot find one that is quite equal to our own stock either in earliness or quality. There are other tomatoes offered under different names which are said to be earlier than Earliana, but we have found none to be any earlier and most of them are irregular in shape and not colored well.

This special strain of Earliana is not only extremely early (there is no tomato earlier), but the fruit is **perfectly smooth**, very solid and firm and is well colored right up to the stem.

Gardeners find this is a most profitable tomato to raise. The early crop brings high prices and the fruit that ripens later is of such good shape and color that it brings almost as much as the later varieties.

We offer seed of our own growing at Moreton Farm. It is Northern grown as we are on the north border near Lake Ontario. Ounce 45c; $\frac{1}{4}$ lb. \$1.40; lb. \$5.00.

Over \$1,000.00 per acre

"I was well pleased with your Earliana tomatoes as they were very early and the first fruit was nice and smooth. The first pickings sold for 25c per lb. wholesale and even the last of them I realized as much for as the other growers did for the other varieties. I realized \$518.00 out of a half acre. Never sold the like in this section of the country."—Geo. T. Harris, Belleville, Ont.

"I had a test of different strains of Earliana last year and yours was by far the best, beating the Langdon strain in a big way."—D. C. Paschke, North East, Pa.

"I have used your strain of Earliana tomato for five years in competition with several others and can find none to compare with it. It comes earlier and the later ones round up nicely for the factory men."—W. T. Chaffy, Marion Sta., Md.

"I have been gardening for over 40 years and have had some great crops of Earliana tomatoes, but those I got of you beat anything I ever saw. Clusters of 8 to 12 tomatoes large and smooth, and as high as 28 on a plant."—S. C. Spear, Altmar, N. Y.

HARRIS' SUCCESS TOMATO

We have been "breeding up" this tomato for years and now have a strain that we consider superior to any other main crop variety with which we are acquainted.

The fruit is practically perfect—large, well colored, smooth, firm, and of exceptionally fine quality, being quite free from acidity when cooked. In addition it yields more than any other kind we raise. Ripens almost as early as John Baer and Bonny Best and is larger, more solid and yields more.

Gardeners and canners will find this a most satisfactory main crop tomato. Oz. 40c; $\frac{1}{4}$ lb. \$1.25; lb. \$4.50.

JOHN BAER TOMATO

We have improved our stock of John Baer so that it is now even better than when first introduced. We know of no other kind quite equal to it for second early crop.

The fruit is large, smooth, deep red, and colors right up to the stem.

We regard this variety as one of the best medium early tomatoes for market or canning.

Seed of our own growing from very choice fruit. Oz. 40c; $\frac{1}{4}$ lb. \$1.25; lb. \$4.50.

"I have grown John Baer tomatoes ever since it was introduced and think more of it each year and I want to say that the seed I got of you last year was the best I ever had. I sold over \$1,000 worth from 2,200 staked plants, and tomatoes were plentiful and very cheap in this section of the country."—W. O. Kindig, Medina, Ohio.

TOMATOES

The very earliest tomatoes are never quite as large and well colored as the later varieties, but Earliana of a carefully selected strain is the nearest perfect of any really early variety we know of. Harris' Extra Early Earliana is earlier than the old strain, and also colors better. John Baer is about a week later than Earliana, ripening with Bonny Best and has slightly larger fruit than that excellent variety. Chalk's Jewel is a little later and larger. Success is the heaviest yielding variety, quite similar to Stone, but ripens earlier.

Of the pink varieties, June Pink is the earliest and resembles Earliana, except in color. Early Detroit is a little later, but has large, smooth, well-colored fruit. Globe is a few days later and the fruit is as round as an apple. Ponderosa is very large, but irregular and does not color well around the stem and is not suitable for market. Trucker's Favorite is large, smooth and matures medium late.

	Oz.	$\frac{1}{4}$ lb.	lb.
Earliana, Harris' Extra Early Strain. See description on preceding page	\$.45	\$ 1.40	\$ 5.00
JOHN BAER. Large, smooth fruit, colors perfectly even, bright red all over. Does not crack, very prolific. One of the best second early kinds40	1.25	4.50
BONNY BEST. Very early, large, smooth and bright red with no green around the stem40	1.25	4.50
June Pink. Very similar to Earliana except as to color, which is pink like Beauty40	1.10	4.00
EARLY DETROIT. A pink variety with smooth, evenly colored fruit of good size. A very fine pink tomato35	.95	3.75
Chalk's Early Jewel. Medium early, smooth and well colored40	1.10	4.00
SUCCESS. Very fine main crop variety. Smooth, well colored and solid40	1.25	4.50
STONE. There is nothing finer than a first-class strain of Stone, but it ripens rather late for the most northern parts of the country. Seed of our own growing at Moreton Farm40	1.25	4.50
New Dwarf Stone. Plants like Dwarf Champion with fruit like Stone, very prolific and a valuable variety40	1.10	4.00
Trucker's Favorite. Large, smooth, pink, medium late35	.90	3.25
Imperial. One of the best pink tomatoes for main crop35	.90	3.50
GLOBE. (Livingston's). As round as an apple; color deep pink. One of the very best varieties of this color40	1.10	4.25
PONDEROSA. Magnificent, heavy, solid fruit, often weighing 2 lbs. or more; light pink; medium early; does not color very well45	1.25	4.75
Crimson Cushion. Like Ponderosa but deeper color and smoother40	1.10	4.00
Dwarf Champion. Early, pink, medium size, dwarf plant35	.90	3.50
Livingston Beauty. Large, late, pink, very smooth35	.90	3.50
Red Cherry. Very small red fruit in clusters40	1.10	...
Yellow Plum. Plum shaped, small, yellow fruit40	1.25	...
Red Plum. Small plum shaped fruit40	1.00	4.50

GOLDEN QUEEN. Large, smooth yellow fruit40	1.00	...
Ground Cherry or Husk Tomato. Yellow fruit in husks40	1.00	...
Superb Salad. Small, very smooth red fruit suitable for serving whole in salads. Very prolific40	1.00	...
White Beauty. A pure white tomato of fine quality, smooth and handsome60

TURNIPS

Both the Purple Top and White Milan grow rapidly and are the first to mature. The next is Purple Top Strap-leaf, which is very similar but a little later. Purple Top White Globe is a little later but a much better turnip and is the most popular variety for market. White Egg is a handsome white-egg shaped turnip, and Golden Ball a nice, smooth, round, yellow variety which grows rapidly. Snowball is round in shape like Golden Ball, but snow white. Yellow Stone is larger and more flat, while Yellow Aberdeen is globe-shaped and grows to a large size, but is better suited for feeding stock than for market.

	Oz.	¼ lb.	lb.
EARLY WHITE MILAN. Very early, flat, white turnip.....	\$.10	\$.25	\$.85
EARLY PURPLE TOP MILAN. The earliest purple top turnip, very fine10	.25	.85
PURPLE TOP WHITE GLOBE. Like Strap Leaf, but round instead of flat. Very fine fall turnip.....	.10	.20	.60
Purple Top Strap-leaf. White, purple top, flat. very rapid grower08	.15	.45
Snowball. Pure white, round as a ball; early, with small tops....	.10	.25	.75
White Egg. Pure white, globe shape08	.20	.60
GOLDEN BALL. Round, smooth, yellow. A fine turnip.....	.08	.20	.60
Cowhorn. Long, white, green top08	.20	.60
Yellow Stone. Very firm, round, light-yellow, medium early....	.08	.20	.60
Yellow Aberdeen. Large, round yellow turnip; very firm and keeps a long time08	.20	.60

RUTA BAGAS OR SWEDE TURNIPS

	Oz.	¼ lb.	lb.
Macomber. A white purple top Swede of very fine quality for table use	\$.25	\$.75	\$ 2.50
IMPROVED LONG ISLAND. A very fine strain of yellow Purple Top Ruta Baga. The roots are smooth and fine with very small neck and few side roots. The flesh is rich yellow and of fine quality12	.30	1.10
PERFECTION SELECTED SWEDE. A fine selected strain of purple top yellow Swede. Grows large but is very smooth and of fine grain. One of the best yellow ruta bagas for market08	.20	.65
Imperial Purple Top. Large, yellow, smooth and a heavy yielder08	.18	.60
White Sweet or French. A good White Swede turnip with green top08	.20	.65

HERBS FOR FLAVORING, Etc.

	Oz.	¼ lb.	lb.
Basil. Used for flavoring soups and sauces. Plant about 18 in. high	\$.15	\$.35	\$ 1.25
Borage. Often used for bee pasture. Sow in spring in the open ground25	.75	2.50
Caraway. Hardy biennial, seeding the second year after sowing. Sow in spring or fall10	.25	.65
Coriander. Sow in spring in the open ground10	.25	.70
DILL. Used for flavoring cucumber pickles, etc.08	.20	.55
SWEET MARJORAM. Easily grown from seed sown in the open ground in the spring20	.60	2.25
Fennel (Sweet.) The leaves are used for flavoring. Easily raised.10	.25	.90
Lavender (true)50
Rosemary. Hardy perennial60
SUMMER SAVORY. Easily grown by sowing seed in the open ground in the spring. Plant grows about a foot high with small, narrow leaves, which are dried on the stems and used for seasoning15	.40	1.25
SAGE, Broad-leaved. When once started will last for years. Should be in every garden. Sow in the open ground and thin the plants to six inches apart25	.75	2.70
THYME. Very largely used for flavoring. The plant will survive the winter if given a little protection.60	1.75
Wormwood. A medical herb used largely for planting in poultry yards for chickens to feed on.15	.50	1.75

VEGETABLES, PLANTS, ROOTS, ETC.

Orders for plants will be entered at any time and the plants sent when ready or when it is time to set them out. 500 plants will be supplied at the 1000 rate.

100 1000

ASPARAGUS ROOTS. The two strains of Washington Asparagus we offer are the best varieties now grown. The Mary Washington is the largest and most vigorous grower, but is not quite as rust-resistant as Martha Washington or "Washington" as it is usually called. Where rust is not troublesome the Mary Washington is decidedly the best to plant. It is so much larger and stronger that anyone can see the difference between this and common Asparagus or even the Martha Washington. For full description of these varieties see our general catalogue.		
Mary Washington. The largest variety. Strong 1-year-old roots from seed of our own raising which we saved from stock plants raised from seed sent us by the Department of Agriculture.....	\$2.00	\$16.00
Washington (Martha). The most rust-resistant variety. Large deep green asparagus tipped with purple. Strong 1-year-old roots.....	1.75	12.00
HORSE RADISH. New Bohemian ("Maliner-Kren.") Superior to common Horse Radish. Earlier, grows faster and yields better.....	1.25	10.00
RHUBARB ROOTS, Myatt's Linnaeus. Large divided roots.....	6.00
SAGE. Holt's Mammoth. The best sage. Doz. \$1.00.....	6.00
BRUSSELS SPROUTS. Long Island Improved Dwarf. Ready June 20..	.60	3.50
CABBAGE PLANTS. Early transplanted plants, ready April 15—May 15. Well hardened in cold frames and will stand considerable frost.		
Early Jersey Wakefield, Golden Acre, Copenhagen Market.....	1.25	10.00
Field grown plants, ready middle of June. All leading varieties...	.40	2.50
CAULIFLOWER. Early transplanted plants ready from April 25 to May 15. Snowball.....		
Field grown plants ready June 20. Snowball and Danish Giant.....	.75	4.50
CELERY. Early greenhouse grown plants ready May 15th. Golden Self Blanching.....		
Field grown plants, ready last of June. Varieties: Golden Self Blanching, Golden Plume, White Plume, French's Success, Giant Pascal, Easy Blanching.....	.50	2.50
PEPPERS. Strong transplanted plants, ready last of May. Harris' Early Giant, Rubby King, Harris' Earliest, Giant Crimson, Giant Cayenne.....	1.75	15.00
PEPPERS. Untransplanted Plants. Ready April 25 to June 1st. Same varieties named above. Weight packed for mailing, 100, 1 lb.; 1000, 4 lbs.60	4.50
TOMATOES. Ready May 10 to June 25. Strong transplanted plants, well hardened. Extra Early Earliana, John Baer, Bonny Best, Success, Stone, Ponderosa (pink).....	1.15	13.00
TOMATOES. Untransplanted Plants. These are taken direct from the seed bed and should be set in frames and allowed to grow for two weeks or more before setting in the field. They are strong, stocky seedlings 3 to 4 in. high. Ready April 10 to May 15th. Same varieties as named above. Weight packed for mailing, 100, 1 lb; 1000, 5 lbs.50	3.50

Note—Special prices will be made on orders for plants in considerable quantities placed early in the season so they can be raised especially for the order.

OUR GENERAL RETAIL CATALOGUE

This price list does not include all the seeds and plants we sell. Our general catalogue for 1925 will be issued in January at which time it will be mailed to all our customers and to others who ask for it. If you do not get a copy it would give us pleasure to send it if you will notify us. The catalogue contains more detailed description of varieties than it is possible to give in this price list.

HARRIS' FLOWER SEEDS

Crego or Ostrich Feather Asters

ASTERS

Harris' Treated Aster Seed

In order for you to have a profitable crop of Asters it is necessary that we do our part by furnishing you with good fresh seed of a high percentage of germination and of the very best quality in the most desirable varieties.

Although we have been trying our best to give you seed with these qualifications, we are going still further and chemically treating our seed as a preventative against any of the diseases that are carried over on the seed. There is one destructive disease, often called a "blight," the spores of which are carried over on the seed, and our treatment is a positive preventative against this disease. Of course, we cannot guarantee your Asters against diseases they may acquire from your soil, but we do claim that the seed, after our treatment, is less liable to acquire other diseases than the same seed would if not treated.

We maintain an extensive testing garden for Asters where we compare all different varieties while growing side by side. In this way we carefully select the most desirable sorts. Many of the varieties are grown here on Moreton Farm or especially grown for us near by where the quality of the crop can be carefully watched.

THREE BEST EARLY ASTERS

Early Asters are often the most profitable to raise for market as they come into bloom before there are any in the amateur gardens. They should be started indoors and transplanted as early as possible.

Extra Early Express Asters

This is the earliest good Aster. The large, fluffy flowers are of the Crego type and come into bloom a few days earlier than the Queen of the Markets, while the plant is a good vigorous grower. The White and Rose are the two best sorts. The Rose is the best extra early bright pink. They should be started very early.

W1142—Rose35	2.50	W1140—Harris' Special Variety		
W1143—Light Blue25	2.00	Mixture25	1.75

Queen of the Market Asters

The standard second early and one that has been profitably grown for years. The flowers are full double and of the Late Branching type, making a desirable shipping flower. The White and Purple are the two best colors, while the Purple is the earliest good purple.

	Tr. pkt.	Oz.		Tr. pkt.	Oz.
W1201—White20	\$1.25	W1202—Shell Pink15	\$1.00
W1205—Purple20	1.25	W1203—Bright Rose15	1.00
W1204—Lavender15	1.00	W1200—Mixed Colors15	.90

Royal or Early Branching Asters

An early Aster to follow up Queen of the Market. The flower and plant resemble the Late Branching in form and size, but blooms 2 to 3 weeks earlier. These are the largest of the early sorts.

	Tr. pkt.	Oz.		Tr. pkt.	Oz.

ASTERS—Continued

Peerless Pink

W1066—Although one of the older varieties, Peerless Pink is still unsurpassed as an all-around, dependable light-pink. We have an exceptionally good strain of our own growing. The color is a delicate shell-pink, deep enough to have character, yet soft enough to be dainty. The very mammoth, full-double flowers are borne on great long stiff stems that keep the flowers well up off the ground. Its season is just a few days earlier than Late Branching. Tr. Pkt. 20c; oz. \$1.50.

Peerless Pink

Lavender Rochester

W1034—This is an especially fine clear lavender aster of the Crego type, but a much better flower than any of the Cregos. It is more double and more Chrysanthemum like, being more full and of greater thickness. The season is about the same as Moreton Pink and it makes a splendid companion to it. Tr. Pkt. 25c; oz. \$2.00.

Crego or Ostrich Feather Asters

We have very carefully tried all of the different varieties of the fluffy or Crego types and have selected the best of each color from the different Crego, Ostrich Feathered, and other similar sorts. These we have listed under the one head of "Crego or Ostrich Feather Asters." This gives us a list of the very best without the confusion of duplication.

	Tr. pkt.	Oz.		Tr. pkt.	Oz.
W1401—White	.20	\$1.25	W1405—Purple	.20	\$1.25
W1402—Shell Pink	.20	1.25	W1406—Lavender Pink	.20	1.25
W1403—Rose	.20	1.25	W1407—Crimson	.20	1.25
W1404—Lavender	.20	1.25	W1400—Special Mixture	.15	1.00

Late Branching Asters

The standard mid-season to late variety. Blooming a little later than Cregos, and remaining in flower a long time, the plants carry a wealth of bloom until late in the fall. The flowers are very large and have broad incurved petals and show no yellow centers. The plants are of branching habit and carry the flowers on long stems, often reaching two feet high. We offer very fine strains of the most desirable colors and would call your especial attention to "Peach Blossom." This is a good lavender-pink shade that has been found very desirable for market and our stock is exceptionally good.

	Tr. pkt.	Oz.		Tr. pkt.	Oz.
W1601—White	.20	\$1.25	W1607—Peach Blossom	.20	\$1.50

W1604—Lavender	.20	1.25	W1600—Special Mixture	.15	1.00

AMERICAN BEAUTY ASTERS

Late blooming Asters from California that are quite distinct. The plants are exceptionally large and vigorous with very long, clean, non-lateral stems, making splendid flowers for late fall cutting. The full-double flowers have long incurved petals which make them almost globe-shaped.

Early Beauty Asters

The Early Beauty varieties are very much earlier than the Late Beautys, yet later than the Late Branching sorts. They are early enough to be sure of blooming and vigorous enough to keep up off the ground during the usual fall rains.

	Tr. pkt.	Oz.		Tr. pkt.	Oz.
W1902—Flesh Pink	.45	\$3.50	W1905—Purple	.45	\$3.50
W1903—Carmine Rose	.45	3.50	W1900—Harris' Special Variety		
W1904—Lavender	.45	3.50	Mixture	.40	3.00

Late American Beauty Asters

The latest Aster grown. Exceedingly vigorous and resists the fall frosts, often blooming until the middle of November. The White is a little earlier than the other colors, coming between the Early and Late Beauty.

	Tr. pkt.	Oz.		Tr. pkt.	Oz.
W1801—Giant White Beauty	.35	\$2.50	W1804—Azure Fairy	.35	\$2.50

W1803—Carmine Rose	.35	2.50	W1800—Special Mixture	.25	2.00

ASTERS—Continued

Moreton Pink

W1025a—Without a question this is the finest bright-pink Aster. The color is a deep cerise, like the Paul Neyron Rose, and the only Aster of this color. The flower is of the Rochester or Crego type, very full double, with long twisted petals. This is one of our Moreton Farm specialties and florists are finding it an indispensable variety. We have a limited supply this year of an especially fine strain for florists' use. The plants are more vigorous and with better stems than usual. Tr. pkt. \$1.00; ¼ oz. \$3.50.

W1025—We have another stock from our general crop which is of the same good quality as last year. The quality of the flowers is the same as our select strain, but the plants are not quite as vigorous. Tr. pkt. 25c; Oz. \$2.00.

Heart of France

W-1078—There is no Aster of recent introduction that has enjoyed such widespread popularity as Heart of France. It is the best "red" Aster for cutting and the most popular for the plant trade. The color is a bright garnet-red and the flowers are large and double on tall robust branching plants. Our stock is true to type. Tr. pkt. 20c; Oz. \$1.25.

Ball's White

W1061—A large white Aster that has been quite popular with the florists. The flowers are supposed to be so full double that the petals appear to be heaped on top of each other. The stems are stiff and non-lateral, and the season the same as Late Branching. Tr. pkt. 25c; oz. \$2.00.

Crimson Giant

W1083—This is a large flowered "red" Aster of upright growth. The flowers are a very rich brilliant blood-red, very large and densely double. This makes a particularly effective Aster for bedding. Tr. pkt. 20c; Oz. \$1.25.

"Your Asters last year brought forth such favorable comment that I want more this year." — E. B. Penfield, West Grove, Pa.

Moreton Pink Aster

Sensation

W1059—A popular red Aster of medium size. Excellent for bedding. Tr. pkt. 20c; Oz. \$1.25.

Choice Mixture of Tall Varieties

W1000—This is a very carefully made mixture of the different varieties of tall branching Asters, such as Royal, Late Branching, Crego, etc. It is well balanced as to colors and types. There are no dwarf or poor sorts in it and it is not a mixture of discards. It is all fresh seed of good germination. Tr. pkt. 10c; oz. 50c; lb. \$10.00.

Ageratum

Splendid bedding plants for spring sales. These are the two best varieties.

	Tr. pkt.	Oz.
W2015—Swanley Blue. Large growing with clear blue flowers	\$.10	\$.50
W2011—Little Blue Star. Very dwarf. Flowers bright blue20	3.00

Alyssum

	Oz.	¼ lb.
W2021—Little Gem. (Carpet of Snow). Dwarf growing white for borders	\$.45	\$1.25
W2020—Maritimum. (Sweet Alyssum). Sweet scented and large flowering20	.60

Asparagus (Ornamental)

These are the varieties so highly prized by the florists, surpassing the most delicate ferns in elegance of habit and delicacy of spray. Our seed is a fine strain of the correct type and all new crop. It is very easy to raise Asparagus from seed by sowing in flats and keeping at a temperature of about 60°.

W2090—Plumosus Nanus. 30c per 100 seeds; \$2.25 per 1000 seeds; \$9.50 per 5000 seeds.
W2091—Sprengeri. \$1.00 per 1000 seeds; \$4.00 per 5000 seeds; \$7.00 per 10,000 seeds.

Harris' Special Orange King Calendula

Begonia

Semperflorens. The following varieties are the best and most popular for bedding plants in semi-shady positions. Also fine for pot plants. Easily grown from seed.

- W2133—**Salmon Queen.** A beautiful brilliant salmon-rose. Tr. pkt. 55c.
W2136—**Prima Donna.** An everblooming rose colored, shading to carmine at the center. Tr. pkt. 60c.
W2135—**Luminosa.** Bright fiery dark scarlet. Tr. pkt. 50c.
W2130—**Mixed Colors.** Splendid mixture of good color. Tr. pkt. 30c.

Bellis or English Daisy

The little double daisies usually sown in July for next spring sales with Pansies and Forget-Me-Nots. Will also bloom the first season if started early.

	Tr. pkt.	Oz.
W2141— Snowball. White	\$.25	\$2.00
W2142— Longfellow. Rose25	2.00
W2140— Mixed Colors20	1.50
W2150— Monstrosa. Mixed colors. Large flowers but not as free flowering30	2.50

Cannas

- W2285—**Mixed Colors.** Saved from large flowering, dark-leaved sorts. 25c oz. \$3.00 per lb.

Castor Oil Bean

- W2500—**Zanzibarensis.** Very tall with gigantic leaves. 15c oz.; 50c per ¼ lb..
W2502—**Sanguineus.** Tall with large reddish leaves and red stalk. 15c oz.; 45c per ¼ lb.

Calendula

Calendula are profitably raised for both cut-flowers and for the spring bedding plant trade. We have a strain of Orange of our own growing that we consider superior to all other strains we have seen. The flowers are large, full double with a light center and of a very deep orange color. The plants are large growing, with long stems and exceedingly floriferous.

	Oz.	¼ lb.
W2201— Orange King, Harris' Special	\$1.00	\$3.00
W2205— Ball's Orange, (Florist Strain)	1.50	4.00
W2202— Lemon Queen20	.60
W2200— Mixed Colors15	.40

Candytuft

Easily grown for cutting during the spring. Also sown late in autumn for earlier spring cutting.

	Oz.	¼ lb.
W2271— Empress. The popular florists' white	\$.30	\$1.00
W2275— Giant Hyacinth-flowered. White40	1.25
W2272— Rose Cardinal30	1.00
W2270— Mixed Colors15	.50

Carnation

The annual Carnations for out-door blooming. In demand as spring bedding plants. This is a large-flowering strain with double sweet-scented flowers.

	Tr. pkt.	Oz.
W2301— White	\$.35	\$2.50
W2302— Pure Yellow50	3.50
W2303— Bright Red35	2.50
W2300— Mixed Colors20	1.25

Harris' New Hardy Carnation

W2310—**Mixed Colors.** Here is a new carnation of our own growing that is actually hardy, yet will bloom the first spring if treated the same as Bellis, Pansies and Forget-me-Nots. These will give splendid plants to sell, potted or in clumps for Decoration Day. They may be also started in January and February for selling in the spring as a hardy border plant.

Also fine to grow for outdoor cutting as it is perfectly hardy, a profuse bloomer and good flowers. We urge you to give it a trial. Tr. pkt. 50c; oz. \$5.00.

Cardinal Climber

- W2315—**Annual climber.** Tr. pkt. 25c; Oz. \$1.75.

Coleus

- W2510—**Extra Choice Large-leaved Mixture.** Easily raised from seed the first season. Our mixture is the best we can obtain. Tr. pkt. 50c

Cobea Scandens

- W2372—**Blue.** A good blue-flowered vine to grow for the spring plant trade. Tr. pkt. 15c; 40c per oz.

"The aster seed that I got from you last year produced wonderful flowers. I did not measure them but some were as large as chrysanthemums. The florist to whom I sold them asked where I got the seed and I told him. He said that he had never seen such nice ones."—Miss Nellie Batchelor, Phillipsburg, Pa.

Centaurea

CYANUS OR DOUBLE BACHELOR'S BUTTONS. The new double Cornflowers or Bachelor's Buttons are proving very profitable as cut-flowers. We have a superior strain that is quite double and clear colors. Our Double Blue is especially fine and desirable.

	Tr. pkt.	Oz.
W2321—White. Without the blue eye.....	\$.15	\$.40
W2322—Rose. Pink shades.....	.15	.40
W2325—Blue. A favorite color. ¼ lb.	\$1.50	.15 .50
W2320—Special Mixture of all colors..... ¼ lb.	\$1.00	.10 .30
W2350—GYMNOCARPA. The fine leaved "Dusty Miller" used for edging and porch boxes. Sown in Jan. or Feb. will make nice plants for spring. Tr. pkt. 15c; oz. 50c.		
W2351—CANDIDISSIMA. The broad leaved "Dusty Miller." The leaves are whiter than those of Gymnocarpa and a slower grower. Tr. pkt. 25c; oz. \$1.75.		

Cineraria

W2540—Hybrida Grandiflora, Mixed Colors. This is the best strain of Hybrid Cineraria we can obtain. Tr. pkt. \$1.00.		
W2520—Stellata (Star Cineraria) Mixed Colors. An easily grown plant for Easter trade. Tr. pkt. 35c.		
W2530—Maritima Candidissima (Dusty Miller). A popular white leaved plant for bedding, porch boxes, etc. Tr. pkt. 10c; oz. 25c.		

"Seeing your ad in the Florists' Exchange of Salvia seed, I sent for one ounce one day last spring. I got 4564 plants from the ounce of seed. I think that this is a wonderful showing and I congratulate you on raising such fine seed."—Wm. C. Hall, Montreal West, Quebec, Canada.

Cosmos

Our Early Flowering Giant Cosmos is an especially fine stock of our own growing that is true early and large flowering.

	Tr. pkt.	Oz.		Tr. pkt.	Oz.
W2451—White	\$.10	\$.30	W2453—Red	\$.10	\$.40
W2452—Pink10	.35	W2450—Mixed Colors. ¼ lb.	\$1.00	.10 .30

Early Flowering Double Cosmos are in great demand. Our strain, which is grown in California, is a large percentage early and double. It is the best we can procure.

	Tr. pkt.	Oz.		Tr. pkt.	Oz.
W2461—White	\$.60	\$4.00	W2463—Red	\$.60	\$4.00
W2462—Pink60	4.00	W2460—Mixed Colors50	3.50

Cyclamen

The choicest of winter-blooming house plants and in great demand every winter. As the price is always high, they are sure to be a profitable crop to grow. If grown without check they should bloom freely in 15 months from sowing. Our seed is the best obtainable.

	100 seeds	1000 seeds
W2491—Giant White. Mammoth pure white flowers	\$1.50	\$12.00
W2492—Giant Salmon. A beautiful bright salmon-pink	1.50	12.00
W2493—Giant Blood Red. A deep rich, red	1.50	12.00
W2490—Persicum, Mixed Colors. A splendid strain of all colors mixed with large flowers. Though not quite as large as the "Giants" they are more free blooming.....	.50	4.00

Didiscus (Blue Lace Flower)

W2746—Coerleus. One of the new popular outdoor cut-flowers. Lavender-blue, lace-like flowers on good stems and a profuse bloomer. Tr. pkt. 15c; oz. 75c.

Dracena

W2750—Indivisa. The popular center plant for vases, porch-boxes, etc. As the seed is sent out in the berry, it should be rubbed out before planting. 10c per Tr. pkt.; 30c per oz.; \$1.00 per ¼ lb.

Grevilla (Silk Oak)

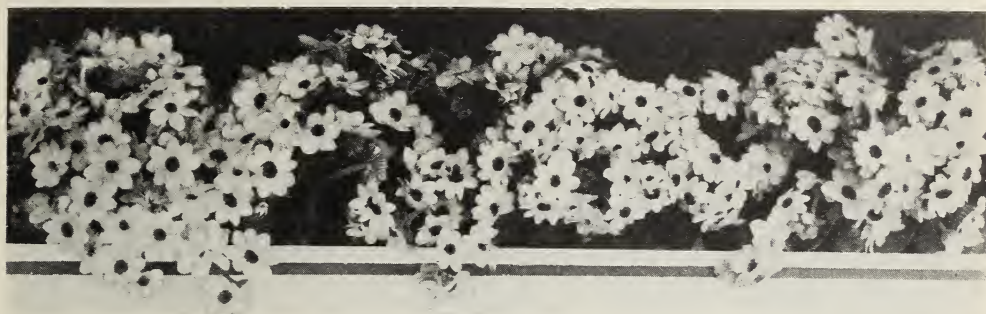

W3000—Robusta. A graceful and ornamental plant with fern-like foliage. Grows rapidly from seed. Tr. pkt. 20c; oz. 60c.

Gypsophila (Baby's Breath)

W2991—Elegans Alba Grandiflora. (Florists' Selected Strain). A splendid large-flowered strain that is one of the most profitable to raise for the cut-flower market. The fine sprays of dainty white are in constant demand. Sow at 14 day intervals. Oz. 15c; ¼ lb. 40c; lb. \$1.25.

Double Blue Bachelor Button
(Centaurea Cyanus)

Myosotis, Royal Blue

Helichrysum (*Straw Flowers*)

The most popular of the "Everlastings" and extensively grown for florists' trade.

	Tr. pkt.	Oz.		Tr. pkt.	Oz.

W3245—Sky Blue	.15	.50			

Lobelia

This class of plants is one of the prettiest that can be grown for hanging baskets, porch boxes or edging to the flower bed, and there is always a good sale for the plants.

W3300—Crystal Palace Compacta (True). The finest dark blue for bedding. 30c per Tr. pkt.; \$2.00 per oz.

W3292—Sapphire (Trailing). For hanging baskets and porch boxes. 20c per Tr. pkt.; 75c per oz.

Moonflower Vine

W3470—A fast growing white-flowered vine, good for a spring plant trade. 30c per oz.; \$1.00 per ¼ lb.

Nemesia

W3650—Large Flowering Hybrids. A very pretty annual of beautiful colorings. Good for growing in a cool house, or sowing outdoors. Tr. pkt. 30c; oz. \$2.00.

"Salvia seed purchased of you was the best I ever sowed."—John Jeannin, Jr., West End Lake, N. Y.

PANSIES

Each year we are improving the quality of our Pansy seed as we realize the importance of highest quality seed to the Pansy-plant grower and we feel sure that we are offering the highest grade Pansy seed for the lowest possible price.

W3700—Harris' Special Mixture. This is our own mixture that is especially made up of some of the very best varieties and choicest colors. We make a special point of this mixture as a medium priced mixture for the florists' plant trade. The flowers are all large, many of them ruffled and with bright colors predominating. Tr. pkt. 30c; oz. \$3.50.

W3704—"Harris' Best" Pansy Mixture. As the name implies, these are our BEST Pansies. The flowers are extremely large with the deep velvety colors. A large percentage have fluted or ruffled petals. Our price for this quality of Pansies is very low. Tr. pkt. 50c; oz. \$6.00.

W3702—Masterpiece Mixture or Giant Ruffled. The flowers of this mixture have fluted or ruffled petals, which adds much to the beauty of the wonderfully rich colors. This stock may be depended upon to be well ruffled. Tr. pkt. 35c; oz. \$4.00.

W3701—Giant Trimardeau. Mixed Colors. We make this high grade mixture by mixing together proportionate quantities of choicest colors of the large-flowering Trimardeau Pansies. This assures you of a mixture well balanced as to color and of large flowers. Tr. pkt. 20c; oz. \$1.50.

W3710—Good Mixture. A good bright mixture of the common sorts. Tr. pkt. 15c; oz. 85c.

W3737—Giant Frilled Purple50	...

PETUNIAS

We have this year, what we believe to be the finest possible assortment of Petunias. We have tried a great many varieties and different strains from many different sources and the Petunias offered in this list are the best we can obtain.

W3800—Harris' Perfection Double. Our strain of Double Petunias is exceptionally fine, coming 85% to 95% true double and the balance semi-double. The flowers are very large and in a splendid range of colors. This seed is grown especially for us by a Petunia Expert and is the very best Double Petunia seed: 200 seeds 75c; 500 seeds \$1.40; 1000 seeds \$2.25.

W3801—Ruffled Giants or Giants of California. The best ruffled Petunias we can possibly obtain. Very large, single flowers with beautiful ruffled edges in many shades of color. 200 seeds 35c; 500 seeds 75c; 1000 seeds \$1.25.

W3803—Fringed Hybrids. These are beautiful single Petunias for bedding. The flowers are not so large as the Ruffled Giants, but are much larger than common Petunias and the edges of the petals are beautifully fringed. 500 seeds 20c; 1000 seeds 35c; 1/16 oz. \$1.50.

W3804—Harris' Special Mixture. A mixture of bedding Petunias made up of good named varieties. Tr. pkt. 25c; oz. \$1.75.

Harris' Giant Ruffled Petunia Quaker Lady

Named Varieties of Petunias

W3814—Harris' Giant Ruffled Quaker Lady. A splendid Petunia of immense size and wonderfully ruffled. The color is a delicate bluish-gray beautifully veined with net-work of deep blue. Comes very uniform from seed. 200 seeds 45c; 500 seeds 85c; 1000 seeds \$1.50.

W3815—Harris' Ruffled Triumph. This splendid Petunia of recent introduction we consider the best pink Petunia. The color is a very bright shade of deep salmon-pink, while the flowers, though not exceptionally large are of the large ruffled type. It produces true to type from the seed and a most satisfactory variety. 200 seeds 35c; 500 seeds 70c; 1000 seeds \$1.25.

W3812—Fringed Miranda. The best brilliant red Petunia. The color is a deep scarlet-carmine while the flowers are large with ruffled edges. 200 seeds 30c; 500 seeds 60c; 1000 seeds \$1.00.

W3811—Fringed Snow Queen. A large well fringed white with a yellow throat. Very fine. 200 seeds 30c; 500 seeds 60c; 1000 seeds \$1.00.

W3813—Fringed Titania. A new color in fringed Petunias. Large velvety, blood-red flowers with a broad white margin. Very striking. 200 seeds 30c; 500 seeds 60c; 1000 seeds \$1.00.

Single Bedding Petunias

	Tr. pkt.	Oz.
W3821—Snowball. White20	\$1.50
W3823—Rosy Morn. Pink.....	.30	2.50
W3824—Rose of Heaven. A new dwarf rose-pink25	2.00

New Balcony Petunias

A new class of Single bedding Petunias that is exceptionally fine for filling vases, porches, etc., or for bedding out. They are very free-blooming and the flowers are large, of good substance, and the colors are clear and bright. The plants are taller than Snowball and Rosy Morn, and are of a semi-trailing habit.

	Tr. pkt.	Oz.
W3841—White25	\$3.00
W3843—Rose25	3.00
W3845—Blue50	6.00
W3846—Crimson25	3.00

"I would like to tell you that I have very grand Petunias from the plants bought of you last spring. I took a large basket of them to our Inter State fair, received first premium and the flower judge said they were the best collection he ever saw."—Ada M. Walker, Athens, Pa.

Primrose

Primroses are one of the florists' most important flowers and some of each class should be grown. We have an exceptionally good mixture each of the most satisfactory varieties. They are all easily grown from seed if carefully sown. To insure more even germination it is well to soak the seeds 24 hours in water before sowing.

W4020—*Primula Veris Elatior*. (Polyanthus or Oxship). **Splendid Mixture**. This is the superb Polyanthus or Hardy Primrose for outdoor growing. Also good for pot culture. Easily raised from seed. Tr. pkt. 40c.

W4030—*Primula Obconica Grandiflora*. **Mixed Colors**. The Obconica Primrose are large flowering and the most free-blooming, making a splendid pot plant that is literally perpetual blooming. Seed sown early in spring will make fine plants for early winter. A fine mixture of all colors. Tr. pkt. 60c.

W4050—*Primula Sinensis Fimbriata*. (Fringed Chinese Primrose). **Splendid Mixture**. For greenhouse culture this is the old standby, easily grown from seed and requiring but 7 months from date of sowing to bloom. Sow in March and a second sowing in May. A wide range of unusual colors. Tr. pkt. 65c.

Phlox

W3860—*Drummondii Grandiflora*. Harris' Special Mixed Colors Tr. pkt. \$.20 Oz. \$1.00

SALVIA

There is no other bedding plant so much in demand as Salvia, and a good even stand of Salvia is always appreciated. Our own strain of New England Grown Bonfire Salvia has all the qualities necessary to please your customers.

W4600—**Bonfire**. This is our own special strain grown in New England for a number of years and thoroughly acclimated to this latitude. It grows evenly as to height, and is the earliest to bloom, every plant coming into bloom at the same time. Tr. pkt. 25c; oz. \$2.25.

W4601—**Splendens**. Later blooming and taller growing than Bonfire. Tr. pkt. 20c; oz. \$1.50.

W4602—**Zurich**. A low growing variety often preferable edging. Tr. pkt. 50c; oz. \$4.00.

W4604—**America**. A strain similar to Bonfire but not as tall growing. Tr. pkt. 45c; oz. \$3.50.

Blue Salvia

W4603—**Farinacea**. A new light-blue Salvia that makes a wonderful cut-flower and a splendid bedding plant. The long flower spikes of clear light-blue are most graceful and attractive and are to use in bouquets with other flowers. Treat plants the same as Salvia Splendens. Will bloom continually from mid-summer until winter, not being injured by frosts. Tr. pkt. 20c; oz. \$1.50.

Scabiosa

The annual Scabiosa are a very good proposition to raise for the cut-flower market, blooming late in the fall after all other outdoor flowers have been injured by frost.

	Tr. pkt.	Oz.
W4651—White	\$.10	\$.50
W4654—Azure Fairy10	.50
W4653—Rose10	.50
W4659—Fire King10	.50
W4650—Mixed Colors10	.40

Smilax

W4950—This is the Smilax all florists use to put with cut flowers. It is easily grown from seed sown in February. They will then be ready for 3-in. pots in May and can be planted in solid beds in July. 30c per oz.; \$1.00 per ¼ lb.

SOLANUM

(Jerusalem Cherry)

W5170—**Cleveland Cherry**. An easily grown and profitable as well as a popular pot plant. The bright red berries of this little tree-like plant are borne in great profusion on the upper side of the branches and above the bright green leaves. This makes it far more desirable than the ordinary varieties. Tr. pkt. 30c; oz. \$1.50.

In a Floral Show held Sept. 4th, 1923, Town Hall, Barrie, Canada, where there were over 400 entries, Miss Brook won 5 first prizes with a few entries of flowers she raised from our seed. The first prizes they awarded her were on Zinnias, Double Petunias, Best 10 Blooms of Asters, Best Collection of Asters, Best Pink Crego Aster (Moreton Pink.)

Scabiosa, Harris' Fire King

"The Pansy seed we recently got from you came up fine, in contrast to seed which we secured from other Eastern concerns much of which was evidently old as it germinated poorly. In the short time we have dealt with you we have found that your seeds are of high quality, and we can therefore depend upon them."—Hanley Bros., Bellevue, Wash.

SNAPDRAGONS

New Giant-Flowering Snapdragons

(*Antirrhinum Maximum*)

These are not only the largest-flowered Snapdragons grown, but they have the largest and most vigorous plants. The unusual colors are exceedingly rich and attractive. The individual flowers are immense and the spikes are long. They are unexcelled for either a plant trade or cut flowers, indoors or outdoors.

W5001—Cerberus. Deep carmine-rose with yellow lip and white throat. Tr. pkt. 15c; oz. \$1.25.

W5002—Gotelind. Brilliant light orange. A magnificent flower. Tr. pkt. 20c; oz. \$2.00.

W5006—Maralda. A bright, brilliant rose that is most attractive. Tr. pkt. 25c; oz. \$2.25.

W5007—Snowflake. Pure white. Tr. pkt. 20c; oz. \$2.00.

W5004—Purple King. Dark, velvety purple. Tr. pkt. 15c; oz. \$1.50.

W5010—Ruby. Bright deep rose, darker than Maralda. Tr. pkt. 25c; oz. \$2.50.

W5008—Copper King. An unusually attractive orange shade. Tr. pkt. 25c; oz. \$2.50.

W5011—Sunshine. Bright yellow. Tr. pkt. 25c; oz. \$2.50.

W5012—Peach Blossom. Delicate light pink. Tr. pkt. 20c; oz. \$2.00.

W5000—Mixed Colors. A splendid mixture of all colors. Tr. pkt. 15c; oz. \$1.00.

Tall Large Flowering Snapdragons

These are not as magnificent as the New Giant sorts, but they are the best of the Tall kinds, with good long spikes of large flowers in the best of colors.

Price of each of the following: Tr. pkt. 15c; oz. 60c.

W5031—Queen Victoria. Pure white.

W5032—Venus. Light pink on white ground.

W5034—Firefly. Scarlet and yellow.

W5035—Golden King. Canary yellow.

W5036—Cresica. Crimson-scarlet.

W5040—Harmony. Terra cotta orange, shaded rose.

W5030—Mixed Colors. Well balanced mixture of all colors.

Tr. pkt. 10c; 50c per oz.

New Giant Flowering Snapdragon
Ruby

Stocks

Double Mammoth Flowering Beauty

We have given our Stocks very careful consideration and find that this strain is the most satisfactory for outdoor blooming. The branching plants grow about 2 feet high and are covered with long sprays of sweet-scented, double flowers.

"Just a word about New Giant Snapdragons as advertised in G. M. which I got from you. I have bought a great many dollars worth of flower seed but never had any that compared with your Snapdragons. The most prolific flowers I ever saw."—Herbert Fletcher, Trenton, N. J.

SWEET PEAS

We have some new varieties of Sweet Peas, in both Winter-flowering and Late Flowering that should prove of interest. All these varieties have been carefully tested in our trial grounds and we consider that we have the best possible selection of varieties and at as low a price as possible.

New Winter Flowering Sweet Peas

These new Winter-flowering Sweet Peas are the best for forcing under glass or for early flowering outdoors.

We have carefully selected the best varieties in each color, all with large Spencer type flowers and good clear colors.

Price. Any of the following varieties: 45c per oz.; \$1.40 per $\frac{1}{4}$ lb.; \$5.00 per lb.

W7001—**Snowflake.** A prolific pure white.

W7005—**Hercules.** Large rose-pink.

W7024—**Zvolanek's Rose.** A very rosy-pink especially good for forcing.

W7013—**Yarrawa.** A standard rich rose.

W7023—**Harmony.** Good clear lavender.

W7022—**Columbia.** Salmon-rose with white wings.

W7028—**Heather Bell.** Large mauve lavender.

W7003—**Songster.** Giant Lavender.

W7027—**Bright and Early.** A new early orange-scarlet.

W7010—**Glitters.** Bright orange-scarlet.

W7026—**Aviator.** Dazzling crimson scarlet.

W7050—**Harris' Special Early Flowering Variety**

Mixture. A mixture especially made up of the above named varieties. This is a well-balanced mixture containing a good proportion of pink shades. 40c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$4.50 per lb.

W7000—**Mixed Colors.** A good mixture of all good varieties, grown as a mixture. 35c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.50 per lb.

Hercules Spencer Sweet Peas

Spencer Sweet Peas

The following varieties are the large waved or orchid-flowered Sweet Peas that come into bloom outdoors a little later than the Early Flowering. Our list has been carefully chosen to include only the best varieties of the leading colors.

Price of any of the following varieties: 25c per oz.; 75c per $\frac{1}{4}$ lb.; \$2.50 per lb.

W7501—**Constance Hinton.** Vigorous.

W7514—**King White.** Mammoth White.

W7508—**New Miriam Beaver.** Soft pink suffused with salmon.

W7517—**President.** Large brilliant orange-scarlet.

W7507—**Mrs. Cuthbertson.** Giant rose and pink.

W7519—**Hawmark Pink.** Rose-pink shaded salmon.

W7502—**Hercules.** Large bright pink.

W7503—**Margaret Madison.** A perfect azure blue.

W7522—**Mrs. Tom Jones.** Best bright blue.

W7510—**Improved Tangerine.** A clear sun-proof orange.

W7525—**Dobbie's Orchid.** Delicate lavender-pink shade.

W7509—**Dobbie's Sunproof Crimson.** Rich crimson-scarlet.

W7523—**Royal Scott.** The most brilliant scarlet.

W7513—**Royal Purple.** Distinct rich purple.

W7524—**Jack Cornwall V. C.** Dark violet blue.

W7550—**Harris' Special Spencer Variety Mixture.** Like our Early Flowering Variety mixture, this is an especially made mixture, insuring a good range of the above named varieties. 20c per oz.; 65c per $\frac{1}{4}$ lb.; \$2.00 per lb.

W7500—**Mixed Colors.** A good mixture of good varieties grown as a mixture. 15c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.50 per lb.

Grandiflora Sweet Peas

W7700—**Mixed Colors.** For those who want a good mixture at a cheap price we offer this mixture of good Grandiflora varieties. Oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c.

"I wish to express my appreciation of the honesty of your descriptions in your catalogue. As I have told many of my friends when recommending your products, your seeds and plants often exceed and never fall below your descriptions."—Clara M. Currier, Andover, N. H.

ZINNIAS

Good Zinnias are one of our specialties and we give them a great deal of attention in an effort to have the best Zinnias. We have some new Zinnias this year that are well worth your growing.

We would ask you to remember that, in spite of all we can do Zinnias will not come 100% true to type. The Large Flowering Double is an older strain and consequently the colors are more firmly established, although some shades are almost impossible to hold true. The new Dahlia-flowered and Giant varieties are necessarily somewhat variable in type and color. We say this so that you will not be disappointed if all the flowers are not perfect. Our stock is the very best we can produce. It is also true that season and soil conditions influence the characteristics of the flowers.

Harris' Double Giant Lemon Queen

Harris' Double Giant Zinnias

A new strain of Zinnias that are of immense size and very double. The centers are small and not conical shape and the petals more loosely placed than in the Dahlia-Flowered. This gives the flowers a more graceful and less stiff appearance.

	Tr. pkt.	Oz.
W8125—Lemon Queen. Of immense size and pleasing yellow color. The best lemon Yellow Zinnia	\$.20	\$2.00
W8126—Orange King. A mammoth flower of the same striking shade as Orange King Calendula20	2.00
W8100—Mixed Colors. A wonderful variety of colors of our own growing. This is no ordinary stock of Mixed Zinnias, but one containing a large percentage of the brightest colors as well as the unusual shades and all of immense size25	2.50

Giant Double Dahlia Flowered Zinnias

Another new type of mammoth flowering Zinnia from California. These are the grandest Zinnias we are able to get. The plants are tall growing and the stems long, while around the center of the flowers the petals tend to be tubular, resembling a Dahlia of the "show" type. They make wonderful exhibition Zinnias.

	Tr. pkt.	Oz.
W8152—Oriole. Orange and gold, changing as it ages	\$.50	...
W8153—Exquisite. Light Tyrian rose with a deeper center50	...
W8154—Old Rose. Beautiful old rose shade50	...
W8155—Crimson Monarch. Enormous bright crimson-scarlet50	...
W8150—Mixed Colors. A well blended mixture containing the above named kinds as well as many others30	2.00

Large Flowering Double Zinnias

Real good double Zinnias of large size and fine colors. These colors run very uniform and bloom more profusely and more uniformly than the Dahlia-Flowered or Giant.

Pink Sunrise Zinnia

W8256—A medium sized plant and flower of a very popular Salmon-rose shade that is an exceptionally fine bedder. Tr. pkt. 10c; oz. 60c.

"I want to say that most of the things we get from you are in excellent condition and grow well. My double Giant Zinnias are the pride of the neighborhood, the biggest and prettiest I have ever seen."—Mrs. G. J. Huizinga, Kalamazoo, Mich.

SEEDS OF HARRIS' HARDY PERENNIALS

We are large growers of the choicest varieties of hardy perennial plants and seeds and, with very few exceptions, all of the seed offered is of our own growing and all is good fresh seed of the highest germination. The seeds of most perennials do not retain their vitality for very long, while many varieties, even at their best, germinate very slowly, so for that reason it is best to sow only the freshest and best seed.

GLADIOLI

There is no more popular flower to raise for cut-flowers than the good varieties of Gladioli. This list is very carefully selected from the innumerable varieties on the market and represents the most desirable sorts for the florists' use. They are all varieties that have been thoroughly tried out on the markets and are being grown by florists throughout the country. This point is very important, because there are so many sorts on the market, although they might be

very beautiful, yet for some reason do not prove to be adapted to florists' use.

For our novelties and show varieties, see pages 94 and 95 of our General Retail Catalogue. Here we have some exceptional kinds worth trying. Our bulbs are of our own growing and are all good well-cured, full-sized, bulbs, free from disease.

"First Size" bulbs measure $1\frac{1}{2}$ inches and over in diameter.

"Second Size" bulbs measure $1\frac{1}{4}$ to $1\frac{1}{2}$ in. in diameter.

	First size		Second size	
	Per 100	Per 1000	Per 1000	
America. Large, soft flesh-pink	\$ 2.50	\$22.00	\$17.50	
Early Sunrise. A new extra early bright-pink of immense size	10.00	75.00	65.00	
E. J. Shaylor. A splendid deep rose-pink. Flowers are large and ruffled. Fine for cutting	7.50	65.00	50.00	
Evelyn Kirtland. For an all-around florist's variety, this is probably the best. The color is bright, warm silvery-pink while the flower is of a splendid type	5.50	45.00	35.00	
Flora. The finest late yellow	6.50	55.00	45.00	
Halley. Extra early light pink	3.00	25.00	
Herada. Pure mauve with deeper markings in throat. Very popular with florists	6.00	50.00	40.00	
L'Immacule. One of the best pure whites. Early, with long spikes of graceful white flowers	6.50	55.00	45.00	
Lily White. An extra early Ivory white	5.50	45.00	35.00	
Le Marechal Foch. The most popular florist's flower of recent introduction. An extra early mammoth silvery-pink. Rapidly replacing America	4.50	35.00	28.00	
Loveliness. A beautiful cream-yellow of graceful form	6.50	55.00	45.00	
Mrs. Dr. Norton. A popular delicate pink with sulphur throat. One of the best for florists	6.50	55.00	45.00	
Mrs. Francis King. Immense vermilion scarlet	4.00	28.00	23.50	
Mrs. Frank Pendleton. Large light pink with crimson blotch	4.00	30.00	24.00	
Mrs. Watt. A beautiful wine red. A very pleasing shade	5.00	45.00	35.00	
Niagara. Soft yellow slightly splashed with carmine	5.00	40.00	32.00	
1910 — Rose. Warm, deep pink with fine white stripe on lower petal. A good color	7.00	60.00	50.00	
Panama. Large late silvery-pink	4.00	30.00	24.00	
Peace. Immense white with purple penciling in throat	4.25	35.00	28.00	
Prince of Wales. Very early clear salmon-pink	5.00	40.00	32.00	
Red Canna. A very late and tall crimson-red. Fine for late cutting	6.00	50.00	40.00	
Schwaben. Large flowered canary yellow	4.00	32.00	25.50	
War. Large crimson-red, deeper than Red Canna	6.00	50.00	40.00	
Wilbrink. An extra early light pink. The season and form of Halley and the color of America	4.50	35.00	28.00	
Yellow Hammer. The earliest yellow for outdoors or forcing	5.50	45.00	35.00	
Alice Tiplady. (Prim.) The most popular orange colored large flowering Primulinus	6.00	55.00	40.00	
Harris' Superb Color Mixture. A special mixture made up of equal proportions of 10 of the leading colors	4.00	35.00	
Harris' Exhibition Mixture. A most excellent high-grade mixture made up of only the very choice varieties, such as rarely found in mixtures. This is not a cheap mixture but a less expensive way to buy an assortment of high grade exhibition sorts, many of which are listed only in our retail catalogue	6.00	55.00	
Harris' Rainbow Mixture. A choice mixture at a low price. This mixture is made up of a great many sorts in large variety of colors	2.00	25.00	
Harris' Moreton Mixture. A most excellent mixture of all choice varieties in second size bulbs. This mixture contains an unusually wide range of varieties	20.00	
PRIMULINUS Hybrids. An excellent mixture including many named varieties ..	2.50	20.00	15.00	

Insecticides and Fertilizers, Etc.

TOBACCO DUST. Used extensively for dusting plants to destroy or repel bugs and plant lice. For fumigating green-houses the tobacco dust we sell is most excellent. It burns evenly and will light without the use of kerosene. Five pounds will fumigate a house 20 x 100 feet. 5-lb. package 50c; 10 lbs. 75c; 50 lbs. or more at 5c per lb.

HALL'S NICOTINE SULPHATE (40% Nicotine). Often called "Black leaf 40." A very effective insecticide for aphids, "lice" and all soft-bodied insects, such as rose aphids, apple tree aphids, etc. It is so concentrated that one part to 800 or 1000 parts of water makes an effective spray, costing less than two cents per gallon. Directions for use are printed on the can. 1 ounce bottle 35c; ½ lb. tin \$1.25; 2 lb. tin (qt.) \$3.50; 10 lb. tin \$12.50.

FORMALDEHYDE, (40 per cent). A valuable disinfectant for destroying germs that cause diseases in plants. It is very effective when used to destroy smut germs in oats and scab on potatoes. To treat oats use 1 pound (pint) formalin to 50 gallons of water and soak ten minutes. For potatoes use 1 lb. to 30 gallons of water and soak two hours. In one-pound cans 50c per can; 6 cans \$2.50.

PULVERIZED SHEEP MANURE. This is an excellent fertilizer for all crops. It is rather costly to use on a large scale but for small gardens and especially for greenhouses and frames it can be used to great advantage. It not only furnishes actual plant food but also humus which is not supplied by chemical fertilizers. This dried sheep manure contains 2½% nitrogen, 1½% phosphoric acid and 1½% potash. There is no straw or other rubbish in it. It is pure dried and pulverized sheep manure. Use about 1 lb. to 4 or 5 square feet of surface.

	Price
10 lb. bag	\$.60
50 lb. bag	1.50
100 lb. bag	2.50
1000 lbs. 10 bags	22.50

NITRATE OF SODA. Gardeners should always have some nitrate of soda on hand and use it whenever they want to promote a quick, strong growth in plants. A little nitrate dissolved in water at the rate of about a tablespoon (1 oz.) to 2 gallons of water will stimulate a rapid growth either when applied to plants in frames, greenhouses or the open ground. If your plants don't grow well, try nitrate on them—but don't use too much. 10 lbs. 65c; 50 lbs. \$2.75; 100 lbs. \$4.50; 200 lb. bag \$8.50.

BONE MEAL. This is one of the best fertilizers for gardens, lawns, shrubs, fruit trees, etc. It is perfectly harmless and can be used with safety in any quantity desired. The plant food in bone meal is not immediately available so its benefit extends over a longer time than is the case with other fertilizers that are more soluble.

This bone meal is raw bone finely ground and contains 4½ per cent ammonia (nitrogen) and 50 per cent phosphate of lime. 10 lbs. 60c; 50 lbs. \$2.25 100 lbs. \$4.00. Bags of 200 lbs. \$6.25 per bag.

Lowest price will be quoted on large lots at any time.

Pot Labels and Garden Stakes

Keep a record of the kind and variety of seeds sown, dates, etc. Every gardener should use stakes and labels.

Pot Labels	Plain		Painted	
	100	1000	100	1000
4 in. long	\$.20	\$1.30	\$.25	\$1.70
5 in. long	.22	1.60	.28	2.10
Garden Stakes				
12" long, 1¼" wide	1.25	9.50	1.50	11.00

These are nice, smooth, white wooden labels of best quality. Weight for mailing: Pot labels 3 lbs. per 1000. Garden stakes 2 lbs. per 1000.

Green Line. Good strong hemp garden line. 50 feet 50c; (by mail 55c); 100 feet. 75c; 200 ft. \$1.25. Weight 1 lb. per 100 ft.

Save Cabbage Plants from Maggots

Tar Paper Pads. To protect cabbage and cauliflower plants from injury by maggots at the roots nothing has been found more successful than these pads or collars which consist of a round piece of tarred paper with a slot on one side and a hole in the center. These pads are slipped around the stems of the plants after they are set out. They prevent the flies from laying the eggs which produce the maggots on the stems at the surface of the ground. We have found that when these pads are put on the day the plants are set out and are not covered with earth they save fully 90 per cent of the plants. Price 100 pads 40c; 1000 pads \$2.50; 5000 or more \$2.00 per 1000.

Raffia. Used for tying bundles of plants, for tying plants to stakes, for budding and grafting, and many other purposes. It is very economical as it costs less than string. 1 lb. 25c; 10 lbs. or more 15c per lb.

"AUTO SPRAY No. 1"

This is the most convenient hand sprayer we know of. We use it on our own farm and can highly recommend it. In construction and workmanship it is superior to other similar sprayers.

To Operate: Remove pump with a half turn, fill tank two-thirds full of solution. Replace pump and with a few strokes compress air on solution.

Then direct the spray. Two pumpings will discharge contents.

Uses: For spraying trees, shrubs, vines, field crops, green houses and country houses; for applying

Paris green, arsenate of lead, bordeaux, lime and sulphur emulsions, disinfectants, cattle-fly oil, whitewash, cold water paints, etc.

Special Features: Strength, simplicity and balanced construction, a nozzle which does not and cannot clog, and the only clog proof nozzle on a compressed air sprayer, no matter what competitors claim, as automatic shut-off device (Auto-Pop) which saves the solution and operates without fatigue, spreader to prevent wrinkling leather cup, iron parts malleable, and hose of extra quality. Remove nozzle to get solid stream.

EQUIPMENT: Carrying strap, 2 ft. ½ in., hose, fine spray nozzle and stop-cock or Auto-Pop as ordered.

Auto-Pop No. 1—Patented automatic shut-off. To stop the flow of solution it is necessary only to release the fingers.

SPECIAL EQUIPMENT: Extension Pipe—brass, 2 ft. lengths. Connects direct to the shut-off. Three lengths generally used for trees.

Brass Elbow—For reaching the under side of leaves or spraying at an angle.

Auto-Spray No. 1 Brass tank with auto-pop \$8.75

Auto-Spray No. 1 Galvanized tank with auto-pop 5.85

Extension pipe 2 ft. length brass each .50

Elbow for extension brass .35

Weight of Auto-Spray No. 1 packed for mailing is 11 lbs. Please add postage if to be sent by parcel post.

HARRIS' SEED *for* MARKET GROWERS

EXTRA EARLY EXPRESS ASTERS

The Best Extra Early Aster

It is the earliest Aster, coming into bloom just ahead of Queen-of-the-Market. The big shaggy flowers are larger and better than those of other extra early varieties. This makes it a most profitable Aster for the cut flower grower, and one we can highly recommend.

Our seed is all new crop seed of good vitality and it has been chemically treated against "blight."

See descriptions and prices on page 36
